raisin water ballet
Watch the dancing raisins do their stuff.

What Do You Need?
- Your Pop Bottle with the top part removed
- Water
- Vinegar
- Baking soda
- 10 raisins

What Do You Do?
1. Fill your Pop Bottle about halfway with water.
2. Pour in 4 tablespoons of vinegar.
3. Add 3 tablespoons of baking soda. (The mixture will begin to fizz.)
4. Drop in the raisins. They may sink initially, but will soon bounce around in the bottle.

What’s Going On?
The vinegar and baking soda create carbon dioxide bubbles, the same gas that carbonates soda pop. Bubbles will gather under the raisins until there’s enough fizz to raise the raisins to the surface. There, the bubbles burst, and the raisins sink back down.

Have Some Cleaning to Do?
The vinegar and baking soda mixture makes a super cleanser. Try it (without the raisins) on the kitchen or bathroom sink and see.
