AVAILABLE NOW
Botany for Gardeners, Fourth Edition
An Introduction to the Science of Plants
BRIAN CAPON

Botany for Gardeners has been expanded and updated to feature a revised interior, with new photos and illustrations that clarify the concepts. Additional updates address scientific advances, changes in nomenclature and taxonomy, and more. As before, Botany for Gardeners shares accessible information about how plants are organized, how they have adapted to nearly all environments on earth, their essential functions, and how they reproduce.

$21.95/$29.95 CAN; 9781643261430
Paperback; 280 Pages; 6" x 9"; 161 color photos; 56 illustrations

In 50 cards illustrated with stunning photographs, plant designer Baylor Chapman profiles her go-to varieties, explains how to care for them, and shares dozens of fresh and surprising ideas to greenify and beautify your home.

$18.99/$23.95 CAN; 9781648291661
Cards; 50 Pages; 5" x 6 ½"; full color throughout

AVAILABLE SEPTEMBER

PLANT SPOTLIGHT | MONSTERA

This huge, beautiful leaves of the fascinating deliciosa have adapted to the indoor tropical environment, from the root to the frond tips. Here, the pattern of holes and ribs makes the plant wind resistant as it grows.

â The shape makes it very easy to take out of the way when not in use.

â The plant is toxic to pets and mildly poisonous to humans.

DESIGN IDEA | BATHROOM

When approaching your room design, consider the space overhead, at eye level, and on the ground. If you think about plants, you'll have to think big, bold, and beautiful to fill the needs of all the rooms in your home.

Overhead: Hanging plants like the spider plant (upper right) and tall floor plants like the Madagascar dragon (far left) not only envelop the scene in a canopy of green but also provide dramatic scale.

Eye level: Plants in this zone will deliver instant impact whenever we walk into a room. The snake plant (center) and monstera (right) work particularly well at this height because their bold-shaped leaves provide interest when viewed from the side.

Ground level: Plants placed at lower levels will frequently be seen from above. Glance down at the bird's nest sansevieria (in the gold vase) while climbing in the tub, and you'll appreciate its charming rosette.

PLANT CARE 101

While plants are adaptable, in order for them to thrive, they should be kept in your best approximation of their preferred light- ing conditions. If you're not a sun-loving plant or are in a northern hemispheric climate, it may make sense long to allow direct sunlight in the first place. The Plant Spotlight cards include all variations on each plant's preferred lighting conditions; following are the categories you'll see listed. (Essentially, light's intensity drops as the distance from a window increases.)

Direct light: Direct light means the sun is shining right on the plant for at least a few hours a day, which is ideal in the northern hemisphere. Think of a south-facing window, which gets direct light most of the day.

Bright light: Bright light means the sun is shining in the same spot for at least a few hours a day, but it may be filtered through a sheer curtain or otherwise not as direct. Think of a window that gets both sun and shade, or a window facing north in the southern hemisphere.

Moderate light: This is in parts of the room that get a lot of light but not always direct sunlight. Think of a room with many windows or a wall with a large window.

Low light: Low light is far enough away from the source of illumination, like the opposite side of a room with a small window, that you wouldn't see direct sunlight through the glass.
In his new book, Jeff Lowenfels digs into the new science behind how endophytic bacteria supply nutrients to a large array of plants and explains, in accessible language, how this information applies to home gardeners, small-scale farmers, and cannabis growers. Based on cutting-edge science that will help gardeners increase plant health and productivity, *Teaming with Bacteria* is a must-have addition to every organic gardener’s library.

$25.00/$31.00 CAN; 9781643261393
Jacketed Hardcover; 172 Pages; 6” x 9”; 34 color photos; 11 illustrations

BURDOCK

CrABAPPLE
The Complete Book of Ground Covers
4000 Plants that Reduce Maintenance, Control Erosion, and Beautify the Landscape
GARY LEWIS

In this meticulously researched reference, nurseryman Gary Lewis profiles more than 4000 ground covers that can unify a landscape, knit together plantings and hardscape, and add extra layers of beauty, dynamism, and surprise. No matter what kinds of conditions a gardener faces—shade, dry soil, heavy clay, excess moisture—there’s a ground cover that will thrive and beautify their garden.

$50.00/$63.00 CAN.; 9781604694604
Paper Over Board; 456 Pages; 8½” x 11”; full color throughout

AVAILABLE OCTOBER
In this inspiring and practical guide, Terrain's plant experts share their favorite houseplants, plus succulents and cacti, indoor trees, the best low-care plants, and "rule breakers" like bamboo muhly. Along the way, Terrain introduces their favorite independent growers who are creating new hybrids and bringing back old-school specimens to the market. Readers also learn Terrain's way of styling and overarching philosophy on care: the most important thing we can give our plants is our presence.

$35.00/$48.00 CAN.; 9781648290909
Paper Over Board; 256 Pages; 8" x 11"; full color throughout
American Roots
Lessons and Inspiration from the Designers Reimagining Our Home Gardens
NICK MCCULLOUGH, ALLISON MCCULLOUGH, TERESA WOODARD

In American Roots, Nick McCullough, Allison McCullough, and Teresa Woodard highlight designers and creatives with exceptional home gardens, focused on those who push the boundaries, trial extraordinary plants, embrace a regional ethos, and express their talents in highly personal ways. Covering all the regions of the country, American Roots is a beautiful invitation to reconsider how we define the American garden, filled with guidance and encouragement for anyone looking to dig more deeply into their own home garden.

$40.00/$50.00 CAN; 9781643261164
Paper Over Board; 320 Pages; 8 ½" x 10"; full color throughout

“I love this book. Here are home gardens of designers from every part of our great country that are inspiring proof of a passionate vitality and freshness in American gardening today.” — Page Dickey, author of Uprooted
We Are the ARK
Returning Our Gardens to Their True Nature Through Acts of Restorative Kindness
MARY REYNOLDS, RUTH EVANS

Individuals can’t save the world alone. But if millions of us work together to save our own patch of earth—then we really have a shot. In We Are the ARK, readers discover how one person’s actions can effect big change in this world by re-establishing the earth’s intelligent, successional process of natural restoration, and in the process create their own safe havens for the magic and abundance of the natural world.

$30.00/$38.00 CAN; 9781643261782
Paper Over Board; 276 pages; 6" x 8"; 200 color illustrations

NEW & NOTEWORTHY
100 Plants to Feed the Birds
*Turn Your Home Garden into a Healthy Bird Habitat*
LAURA ERICKSON

The growing group of bird enthusiasts who enjoy feeding and watching their feathered friends will learn how they can expand their activity and help address the pressing issue of habitat loss with *100 Plants to Feed the Birds*. In-depth profiles offer planting and care guidance for 100 native plant species that provide food and shelter for birds throughout the year, from winter all the way through breeding and migrating periods.

LISA M. ROSE

Rose explains how to find, identify, harvest, and cook with 50 common wild plants. Plant profiles include all the basics necessary for a successful forage: clear photos of the plant before and after harvest, tips for ethical and safe gathering, and details on culinary uses. Simple recipes for each plant will help readers cook with their harvest.
