Windcliff
A Story of People, Plants, and Gardens

DANIEL J. HINKLEY
WITH PHOTOGRAPHY BY CLAIRE TAKACS

Daniel Hinkley is widely recognized as one of the foremost modern plant explorers and one of the world’s leading plant collectors. He has created two outstanding private gardens—Heronwood and Windcliff. Both gardens, and the story of how one begat the other, are beautifully celebrated in Hinkley’s new book, *Windcliff*.

Readers will delight in Hinkley’s recounting of the creation of his garden, the stories of the plants that fill its space, and in his sage gardening advice. Readers will also cherish Hinkley’s spirited ruminations on the audacity and importance of garden-making—contemplations on the beauty of a sunflower turning its neck from dawn to dusk, the way a plant’s scent can spur a memory, and much more.

Filled with Claire Takacs’s otherworldly photography, *Windcliff* is spectacular for both its physical beauty and the quality of information it contains. It is a must-read for every passionate gardener and a must-have gift book for gardeners and plant lovers.

DANIEL J. HINKLEY is one of the foremost plant collectors of our time. His garden at Windcliff, on Washington State’s Kitsap Peninsula, is renowned for its audacious design, as well as for its deft use of rare, fascinating plants.

Adventures in Eden
An Intimate Tour of the Private Gardens of Europe
CAROLYN MULLET

Wherever Carolyn Mullet travels, she seeks out new gardens to explore. In Adventures in Eden, she invites readers along with her on a photo-rich armchair tour that illuminates the beauty and artistry of European gardens.

This journey across Europe profiles 50 private gardens in Belgium, England, France, Germany, Ireland, Italy, the Netherlands, Scandinavia, Scotland, and Spain. In short profiles supported by lush photography, the reader will learn the history of each landscape, why the specific plants and designs were chosen, and how the gardens connect to their surroundings. Some of the featured gardens were designed by their owners, while others were designed by some of the biggest names in garden design: Tom Stuart-Smith, Andy Melengier, and Louis Benech, among others.

Sumptuously illustrated with hundreds of photographs, Adventures in Eden is a must-have gift book for gardeners, globetrotters, and dreamers.

CAROLYN MULLET is the founder of Carex Garden Design which offers complete garden design. She is also the principal of CarexTours, which has quickly gained a reputation for offering garden tours anywhere.

A Gardener Reflects on Beginning Again
PAGE DICKEY

Page Dickey and her husband Bosco recently walked away from their celebrated garden at Duck Hill. After thirty-four years of making, nurturing, and loving their land, they left behind the thousands of perennials, bulbs, and trees they had planted and had watched grow and stretch over time.

In *Uprooted*, Dickey reflects on this transition and on what it means for a gardener to start again. Readers follow her along the journey: searching for a new home, discovering the ins and outs of the landscape surrounding her new garden, establishing the garden, and even learning how to be a different kind of gardener. The surprise at the heart of the book? Although Dickey was sad to leave her beloved garden, she found herself thrilled to begin a new garden in a wilder, larger landscape.

Written with humor and elegance, *Uprooted* is for gardeners and plant lovers, fans of garden writing, and people seeking a meaningful gift for the gardeners in their lives.

**PAGE DICKEY** lectures around the country about plants and garden design and has written many articles for magazines over the years, including *House and Garden, House Beautiful, Architectural Digest, Horticulture, Elle Décor, Fine Gardening*, and *Garden Design*.

Ms. Adventure
My Wild Explorations in Science, Lava, and Life

JESS PHOENIX

Volcanologist, natural hazards expert, and founder of Blueprint Earth, Jess Phoenix has dedicated her life to scientific exploration. Her career path—hard-earned in the still male dominated world of science—has shoved her headlong into deep-sea submersibles, congressional races, glittering cocktail parties at Manhattan’s elite Explorers Club, and numerous pairs of Caterpillar work boots. It has also inspired her to devote her life to making science more inclusive and accessible.

Ms. Adventure follows Phoenix from jungles to glaciers, university classrooms to television studios, and even to the side of the world’s largest volcano, where she fixes a tire with a ballpoint pen, bubblegum, and duct tape. Readers will delight in her unbelievable adventures, all embarked on for the love of science.

Ms. Adventure skillfully blends personal memoir, daring adventure, scientific exploration, and girl power, and it will appeal to fans of books like Lab Girl and Spineless.

JESS PHOENIX is a volcanologist, an extreme explorer, and a professional field scientist. She is a fellow in The Explorers Club, and a featured scientist on the Discovery Channel and the Science Channel.

As the World Burns

The New Generation of Activists and the Landmark Legal Fight Against Climate Change

LEE VAN DER VOO

In 2015, twenty-one youth activists filed the constitutional climate lawsuit Juliana v. the United States, asserting that the government’s actions that cause climate change violate the plaintiffs’ rights to life, liberty, and property. The case has the potential to be a landmark moment in legal and environmental history, but it hasn’t happened yet.

In As the World Burns, Lee van der Voo follows the ever-evolving legal case and tells the plaintiffs’ stories, all under the backdrop of the current climate-related crises happening around the world. Granted unparalleled access to the plaintiffs and their legal team, van der Voo reveals the human side of the climate crisis, the dire effects of decades of inaction, and the potential pitfalls of tackling our environmental issues in the courts.

As the World Burns reveals how tangible harms wrought by the federal government have profoundly damaged our planet. And how the youngest of us are the most willing to take on the fight.

LEE VAN DER VOO is an award-winning investigative and environmental journalist. Her work has appeared in Reuters, the New York Times, the Atlantic, Slate, and the Guardian. Her 2016 book won an Oregon Book Award for General Nonfiction.

A History of the Human Brain
From the Sea Sponge to CRISPR, How Our Brain Evolved

BRET STETKA

Just over 125,000 years ago, humanity was going extinct until a dramatic shift occurred—Homo sapiens started tracking the tides in order to eat the nearby oysters. Before long, they’d pulled themselves back from the brink of extinction. What saved us during that period of endangerment? The human brain, and its evolutionary journey is unlike anything else in history.

In A History of the Human Brain, Bret Stetka takes readers through that far-reaching journey, showing exactly when and how the human brain evolved to shape who we are today. Brain Power also tackles the question of where the brain will take us next, exploring the burgeoning concepts of epigenetics and new technologies like CRISPR.

A History of the Human Brain is for readers of popular science and fans of books like Sapiens and A Short History of Nearly Everything.

BRET STETKA is a regular contributor to NPR, as well as Scientific American, where he writes about neuroscience, psychiatry, and evolution. His work has also appeared in WIRED, Men’s Journal, Slate, Popular Mechanics, and the Atlantic.

A Place Like Mississippi
A Journey Through A Real and Imagined Literary Landscape

W. RALPH EUBANKS

There is a palpable connection to the landscapes of Mississippi displayed in the work of the state’s many lauded writers. This connection to the land runs deep—across onerous lines of class, gender, and race—spanning generations of authors birthed in the Magnolia State. It’s difficult to read Faulkner, Welty, Wright, and Ward and not come away with the very particular sense of place that the state and the greater American South represent in their work.

In A Place Like Mississippi, W. Ralph Eubanks takes readers on a complete tour of the real and imagined landscapes that have inspired generations of authors. Eubanks is a native Mississippian and he knows its writers and its complicated history well. In A Place Like Mississippi, Eubanks honors and explores this landscape and this history, as he reveals the many ways it has informed the work of some of America’s most treasured authors.

Supported by contemporary and historical photography, A Place Like Mississippi is a must-read for fans of Southern literature.

W. RALPH EUBANKS is the author of Ever Is a Long Time and The House at the End of the Road. He has written for the Chicago Tribune, Preservation, Time, the Wall Street Journal, WIRED, the New Yorker, and NPR.
Under Western Skies
Visionary Gardens from the Rockies to the Pacific Coast

CAITLIN ATKINSON AND JENNIFER JEWELL

From desert sands to seaside oasis, gardens in the American West are on the frontier of garden design. Under Western Skies proves this, with profiles of the West’s most innovative gardens.

Atkinson and Jewell reveal how the grandeur and rugged beauty of the region’s landscapes set the stage for stunning and innovative designs, while the various climates allow for a multitude of plant possibilities. Nature is a source of inspiration to the gardeners in this book, rather than something to be dominated, and Under Western Skies shows the deep connection that each gardener has to the place they garden.

Packed with Atkinson’s stunning photographs and laced with Jewell’s deep interest in the relationships between people and the landscapes they inhabit, Under Western Skies is a must-have for passionate gardeners who call the wild West home.

CAITLIN ATKINSON’S photographs have appeared in Elle Décor, Dwell, Martha Stewart Living, Bazaar, Sunset, and Architectural Digest.

JENNIFER JEWELL is the author of The Earth in Her Hands and the founder and host of Cultivating Place.

INNOVATIVE WESTERN GARDENS THAT INSPIRE and INFORM
Herbarium
The Quest to Preserve and Classify the World’s Plants
BARBARA M. THIERS

For nearly six centuries, scientists have been documenting the plants and fungi of the world through herbaria. The wealth of specimens available today, carefully preserved through the centuries, is a unique source of data that not only helps scientists understand how the world’s vegetation has changed over time, but also allows them to predict how it will change in the future.

In Herbarium, Barbara M. Thiers shares the fascinating story of how herbaria began, what they are, and how they function today. Readers will discover the role herbaria have played in the exploration of the natural world, the essential contributions they have made, and how they are now under threat.

Herbarium is heavily illustrated with photographs and unique historical material from the collection at the New York Botanical Garden. It is a must-read for passionate plant fans and conservationists.

As the director of the William and Lynda Steere Herbarium, BARBARA THIERS is responsible for overseeing the garden’s 7.8 million herbarium specimens. The Steere Herbarium is the largest in the Western Hemisphere.

• The fascinating history of herbaria, from one of the world’s foremost experts

Too often gardening advice comes in the form of rules: do this, don’t do that, buy this, don’t buy that, plant this, don’t plant that. But this kind of guidance can stifle creativity and personal expression, resulting in gardens that feel impersonal and generic.

With Fearless Gardening, Loree Bohl has written a call to arms that urges home gardeners to grow what they love. Readers will discover advice on gardening outside their zone, shopping for unique plants, and taking risks in garden design. They will also find tips on how to discover their personal style and expand their plant palette. Bohl profiles exemplary gardens from across North America that showcase each gardener’s unique taste and style and will inspire home gardeners to discover their own.

LOREE BOHL is on the board of directors for the Hardy Plant Society of Oregon and the Garden Bloggers Fling advisory committee. Her writing has appeared in Pacific Horticulture, Digger, the Rock Garden Quarterly, and Better Homes and Gardens.
Deer-Resistant Native Plants for the Northeast

RUTH ROGERS CLAUSEN AND GREGORY D. TEPPER

Deer are an ever-present problem in gardens across the Northeast. In Deer-Resistant Native Plants for the Northeast, Ruth Rogers Clausen and Gregory D. Tepper offer a solution: native plants that deer simply don’t eat.

The plant profiles in this book each include a deer-resistance rating, hardiness zone information, height and spread, and a description that highlights additional species, suggested companion plants, and details on the forms of wildlife each species attracts. Deer-Resistant Native Plants for the Northeast includes, annuals, perennials, ferns, grasses, sedges, and shrubs.

This practical, authoritative, full-color guide is a must-have for home gardeners in Connecticut, Delaware, Massachusetts, Maryland, Maine, North Carolina, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, Vermont, West Virginia, and Washington, D.C.

RUTH ROGERS CLAUSEN is the author of 50 Beautiful Deer-Resistant Plants and The Proven Winners Garden Book.

GREGORY D. TEPPER is a horticulturist at the West Laurel Hill Cemetery. Previously, he worked at Mt. Cuba Center and the Delaware Botanic Gardens.

Oregon, My Oregon
Land of Natural Wonders

PHOTO CASCADIA

Oregon is a big, beautiful state filled with mountains, valleys, deserts, cities, towns, an amazing coastline, and much more. From the high desert of Central Oregon and the scenic vistas of the Columbia River Gorge to awe-inspiring Crater Lake and the forest and farms of the Willamette Valley, its natural wonders abound.

In Oregon, My Oregon, the award-winning team of photographers at Photo Cascadia have captured this magical place in a stunning book that will be embraced by locals and visitors alike. Oregon, My Oregon includes a foreword by Pulitzer Prize-winning journalist and former Oregonian Nicholas Kristof, who captures the breadth and beauty of the state and this must-have book: "Oregon contains multitudes, for this is a state that spans a tremendous range of people, cultures, and terrains. It’s a range that this book seeks to illuminate, along with Oregon’s spectacularly beautiful and varied landscape."

The purpose of PHOTO CASCADIA is to explore areas of natural beauty, encourage stewardship and conservation, and offer inspiration by sharing our images, our stories, and our knowledge with other photographers who share our passion.
Rocks, Minerals, and Geology of the Pacific Northwest
Timber Press Field Guide

LESLIE MOCLOCK AND JACOB SELANDER

Rocks, Minerals, and Geology of the Pacific Northwest profiles 100 rocks, minerals, and fossil types found in the Pacific Northwest. The content is organized by the most common color for each type. Each entry has color photographs showing the range of possibilities in appearance and a description of the defining physical properties and textures. Lists of minerals organized by other physical properties like habit, hardness, and cleavage are included, along with identification flow charts.

Rocks, Minerals, and Geology of the Pacific Northwest also includes 40 landscape features viewable along trails in Washington and Oregon that will empower hikers to make observations and interpretations about how these features came to be.

LESLIE MOCLOCK is the former curator at the Rice Northwest Museum of Rocks and Minerals.

JACOB SELANDER is a geology instructor at Highline College in Des Moines, Washington.
