**Payment Information**  Visa  MasterCard  Discover

Card Number: \_\_\_\_\_ Exp. Date: \_\_\_\_\_

CVV#: \_\_\_\_\_ \*Please include 3 or 4 digit number on back of card.  Please keep my credit card on file for future payments.

## Pool Opening Includes:

- \* Removing all winterizing equipment, plugs and gizmos. If water level is below skimmer, gizmo (plastic tube that plugs the skimmer) will be left in skimmer. Once water is up to skimmer, remove gizmo and open skimmer line at equipment pad.
- \* Starting up pump and filter. **Note: Make sure electric is turned on to pump**
- \* Inspecting pool equipment: pump, filter, visible plumbing, and heater. We will give an estimate if major repairs are needed.
- \* Seal leaks at equipment pad with silicone lubricant and/or Teflon tape. If leak requires a new gasket or oring, part will be added to opening bill.
- \* If Mermaid is removing safety or waterbag cover, folding cover and setting off of deck. Does not include any cleaning of covers.
- \* Lighting of heater pilot light. Start heater/heat pump. Test fire gas heater. **Heater will not be left running!**

## Important Things to Remember:

- Leave all opening equipment and accessories (baskets, drain caps, return eyeballs etc.) easily visible from pool and within 10 feet of pool edge.
- We recommend circulating water 24-48 hours before testing water. For a free analysis, bring a water sample into store (1 pint of water recommended) for the most accurate recommendations.
- Water and debris (leaves, sticks, etc.) **MUST** be removed from cover. If excess water is present on safety/auto cover and technicians aren't able to remove/open cover, pool opening will be rescheduled.
- Technicians will not add water to pool. If water level is low, add water through skimmer prior to opening. Water below the skimmer will not allow technicians to properly open skimmer line.
- Removal of safety cover springs will incur a \$50 upcharge.
- Please insure that electricity is turned on to pool equipment.
- Additional service/repairs at opening (i.e., sand change, plumbing) will be charged for additional parts and labor.
- Additional leaks may occur hours after pool is opened once filter becomes pressurized. This can be a common occurrence. Leaks appearing days after opening of pool are subject to a new service call with additional parts and labor.
- Due to amount of openings scheduled, a specific timeframe cannot be given or guaranteed. Technicians can provide a courtesy call ahead if noted under additional instructions.
- **Technicians will NOT be able to perform any cleaning/vacuuming/leaf dipping at time of opening.**

**SUPERFLO® VS PUMP**  
VARIABLE SPEED SAVINGS FOR THE EVERYDAY POOL

**VS** Variable speed technology saves up to 80% in energy costs\*

 No expensive rewiring needed to upgrade your pump. Runs on standard 115/230v

Talk to us to learn more: 

**Save \$50 when installed at pool opening.**

\*Ask for a free quote on final installed price.

 

[www.pentairpool.com](http://www.pentairpool.com)

\* Savings based on variable speed pump compared to a single-speed pump running 12 hours per day at an average of \$0.16 per kWh in a 20,000 gallon pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.
