Pool Closing Includes:

- * Blowing suction and return lines with air and installing all winterizing equipment.
- * Winterizing pump and filter.
- * Inspecting pool equipment: pump, filter, visible plumbing, booster pump and heater. We will give a written estimate of needed repairs.
- * Installing all winter plugs and removing gauges.
- * Winterizing of heater.
- * **Hand rails and diving boards are NOT removed unless requested or necessary to install/close winter cover.**

IMPORTANT THINGS TO REMEMBER:

- *Technicians WILL NOT provide any pool cleaning during closing.*
- *Technicians WILL NOT lower water level of pool at closing.* **Due to ground water issues in Central Indiana, Mermaid does not recommend lowering water level, instead using a winterizing gizmo in skimmers.
- Technicians will not be able to balance water chemistry, we recommend bringing a pre-closing sample in store at least 48 hours prior to pool closing. Adding winter chemicals doesn't guarantee a clear pool in the spring.
- Leave all winterizing equipment and accessories easily visible from pool and within 10 feet of pool edge.
- Water and debris (leaves, sticks, etc.) **must** be removed from cover to avoid a \$100.00 extra service fee that will automatically be added to closing if not performed by homeowner.
- Additional service/repairs at closing (i.e., replacing seals, o-rings) will be charged for additional parts and labor.
