

# SECURITY MATTERS

Clari is a modern Cloud-based architecture built with industry-standard technologies and services, ensuring enterprise-grade security and data protection for our customers.

## Clari Web

- Encrypted Sessions 256-bit TLS 1.0
- Encrypted Cookies for Sessions
- Strong Authentication
- SAML 2.0 - SSO Integration
- OAuth Client Access Protocols
- OWASP Top 10 verified
- Certificate Verification
- Secure Access and Activity Log
- Session Timeout
- URL Access Restrictions

## Clari Mobile

- Encrypted Sessions 256-bit TLS 1.0

- Encrypted Cookies for Sessions
- SAML 2.0 - SSO Integration
- OAuth Client Access Protocols
- Source Code Hardening
- Clean Data principles
- Certificate Pinning and Verification
- Secure Access and Activity Log
- Transient URLs
- Session Timeout

## Clari Access to Customer Services

- OAuth authentication for Salesforce
- SSO enabled session authentication
- Service API throttling and monitoring API limits
- Support for IP Address lock-downs

## SECURE CLOUD

- ISO 27001
- AWS Virtual Private Cloud
- Secure VPN connections to Customer Data Centers
- Secure access to Microsoft Exchange
- Isolation of Production and Dev/Test environments
- Active Session Monitoring and Timeouts

## SECURE COMPUTING

- AWS Security Groups for Port & IP Address restrictions
- Load balancer based compute isolations
- API Access Keys
- Multi-tenancy with logical client partitioning
- Role-based access control
- Secure logging of application activity
- VeraCode Source-code vulnerability
- OWASP Secure Coding Principles

## SECURE DATA MANAGEMENT

Data Management Layer:

- User Credentials encrypted with AES 256-bit encryption
- Access/Refresh tokens encrypted with AES 256-bit encryption
- Access restrictions to only open application IP Servers
- Server-side encryption of EBS Volumes
- Encrypted S3

## SECURE ANALYTICS

- ISO 27001
- AWS Trust Advisor
- Nessus Vulnerability Scans

---

## KEY THIRD PARTY CERTIFICATIONS & PROGRAMS

- ISO 27001-2003 (All Control Groups)
- Cloud Security Alliance CSA-CAI-1.1
- Amazon Web Services Assessment
- US-EU and Swiss Privacy Shield
- TRUSTe Privacy Certification
- Skyhigh Enterprise Ready Certification

## VULNERABILITY SCANS

Automated security scanning and monitoring

- Nessus Network-Level Scanning
- TinFoil Application-Level Scanning
- DataTheorem Mobile Application Scanning
- Annual manual vulnerability testing
