## Work Experience

### Junior Full Stack Developer

Nexone, Saint-Hubert

March 2023 – Present

- Maintained two electronic document management platforms and an e-signature platform built on the ASP.NET framework with React, jQuery and Backbone.js.
- Designed and developed new frontend implementations for multiple C# applications.
- Developed and worked on stories to build new features and improve the applications I worked on.
- Cooperated with teammates to analyze and investigate many issues to fix and resolve them in a timely manner.
- Built new features to improve user experience throughout multiple applications.

### Terminal Programmer

Precise Parklink, Brossard

2019-2023

- Directed and programmed multiple client projects, putting forth communication and customer satisfaction.
- Created flow diagrams and demo programs for our sales department which resulted in multiple large projects.
- Designed a dark mode interface and Figma boards to streamline UI changes for parking terminals.

### Sales Associate

Rona, Longueuil

2017-2019

- Assembled visual merchandising displays to increase customer engagement for the seasonal department.
- Maintained a high satisfaction rating by providing excellent customer service, resulting in returning clientele.

## Education

### Champlain College, Saint-Lambert

2021 - 2023

#### Computer Science Technology (420.B0)

- Graduated with honours.
- Fully planned and developed a full-stack web application using NextJS (React & NodeJS)
- Implemented new features to an existing micro-service project using Angular and Java Spring Boot

### Saint-Lambert International High School, Saint-Lambert

2011 - 2016

- Graduated with a school based IB Certificate on the honour roll.
- Completed over 75 hours of community/volunteer service.

## Projects

### One Piece TCG Card List Data Scraper - Python

Small Python application to scrape info from a web page and fill a database with relevant card information.

### Business Management Application for Paysages Meloche (External Client Project) - Next.JS (React/Node.js)

- Coordinated meetings with a landscaping company to plan the creation of a web application.
- Planned and developed multiple systems to enhance and modernize current business processes.
- Designed wireframes and renders for mobile and desktop views of the web application.

### PetClinic - Java Spring Boot, Angular

- Led and coordinated a small team of fellow students through scrum methodology to plan and divide work.
- Implemented new features and improved existing functionalities in the visits microservice.
