Hypnotic Realities:
The Induction of Clinical Hypnosis and Forms of Indirect Suggestion

Psychotherapists, whatever their training or specialization, can learn the step-by-step process of clinical hypnotic induction from a pioneer in the field, Milton H. Erickson. Hypnotic Realities is a verbatim transcript of Dr. Erickson's induction of clinical hypnosis and his approaches to trance training. It provides students and professionals with clear examples of the evolution of clinical hypnotic phenomena. 349 pp.

Hypnotherapy: A Case Study

This casebook is the most systematic analysis of Erickson's approach to hypnotherapy. It provides the theoretical principles and practical case studies necessary for professionals, students, researchers. 506 pp., Audio included.

Experiencing Hypnosis: Therapeutic Approaches to Altered States

A continuation of the first two books, in which Milton H. Erickson trains Ernest L. Rossi in clinical hypnosis. 283 pp. Audio & Video included.

Taken together these three landmark books and their accompanying media present a deepening view of what hypnosis is, and the ways in which a creative process of hypnotherapy can be achieved. These materials touch on the ultimate nature of human consciousness and suggest a variety of open-ended approaches to facilitate its exploration in hypnotherapy as well as in formal research.

Erickson’s experimental and therapeutic explorations with the hypnotic modality span more than 50 years. His successful rejuvenation of the entire field may be attributed to his development of the non-authoritarian approaches to suggestion wherein subjects learn how to experience hypnotic phenomena and how to utilize their own potentials to solve problems in their own way. The contents of these volumes can be best understood as working papers on a journey of discovery. There is little that is fixed, final, or permanently validated about them. Most of these papers are heuristics that can stimulate the mind to evoke the awe of discovery, which is unlimited in the realm of human consciousness.

  - Volume III - Hypnotic Alterations of Physiological Functioning
  - Volume IV - Hypnosis: Creative Choice or Manipulation

**Volume I: Healing in Hypnosis**
Volume I contains a fascinating biographical chapter revealing the many important events of Erickson’s life that contributed to the development of his ideas. 311 pp. Audio included.

**Volume II: Life Reframing in Hypnosis**
This second volume is an incredibly rich presentation of Milton H. Erickson's ingenious approaches to hypnosis and psychotherapy. During the time period covered by this volume, Erickson wrote some of his most original papers on the naturalistic and utilization techniques which are considered to be the essence of his approach. 328 pp. Audio included.

**Volume III: Mind-Body Communication in Hypnosis**
Volume III contains much of the source material wherein Milton H. Erickson first expressed his original views on psychosomatic medicine and healing. It will be of vital interest to students, therapists, and practitioners of therapeutic hypnosis who want to integrate Erickson's approaches with the current breakthroughs that are taking place in a psychoneuroimmunology and the new mind-body methods of holistic healing. 304 pp. Audio included.

**Volume IV: Creative Choice in Hypnosis**
This fourth volume builds an important bridge between East and West by illustrating the common denominator of the naturalistic utilization approaches to hypnosis in the West and the traditional Zen methods for achieving satori, or enlightenment, in the East. 274 pp. Audio included.
