Brands like yours are increasingly playing a role in solving the world’s biggest problems.

Hydrologic Carbon Credits
CSR Partnership Overview
June 2018
80% of people lack access to clean water.
Hydrologic sells clean water filters that enable families to disinfect and safely store drinking water at home.
Cambodia’s rainforests are vanishing at a terrifying rate. But Hydrologic water filters end the traditional practice of burning fuel wood to boil and purify water.
Our Impact

• Over 500,000 filters sold.
• 108,000 tons of fuel wood are saved every year.
• 525 hectares of forest degradation are avoided yearly.
• 145,000 tons of CO2 emissions prevented every year, equal to taking 59,000 cars off the road.

#savetheforests
Carbon credits from Hydrologic are Gold Standard-certified and validated by Nexus For Development.
Why buy carbon credits?

By purchasing carbon credits from Hydrologic, you show your customers that you support the transition to a clean energy economy, and you believe *all* people deserve clean water.

#environment #waterforall
Make your employees proud.
Let your customers feel like heroes.
We’re here to help.

Partner Benefits:

• Human-interest stories of rural Cambodian customers for your social media and newsletters
• Clear, transparent language for communicating the verified impact you’re making
• Our support and collaboration in developing a marketing campaign to engage your customers and employees

#worldwaterday #earthday
Why now?

Hydrologic focuses on households earning less than $5/day. Untreated water and poor sanitation cause about 10,000 deaths each year, mostly among children under the age of five. Sources of contaminated water are commonplace: rivers, lakes, ponds, and wells.

We have $1,000,000 in Gold Standard-certified carbon credits ready for purchase. This revenue, once invested in our operations, could be transformative to our company, your company, and the people of Cambodia.

#waterislife #makeithappen
Certification by Gold Standard
- Requires contribution to sustainable development
- Requires local stakeholder consultation
- Requires environmental and social safeguards
- Requires increased assurance from rigorous governance and transparency

Validated by Nexus For Development
Nexus provides at-cost carbon credit management services. Nexus also monitors and verifies the carbon emission reductions generated each year through sales of Hydrologic’s water filters.
