Serving commercial and residential customers, The Stone Store is where you’ll find some of the most unique selections of natural stone and earth products available in the area! We have a vast selection of boulders, topsoil, crushed stone, stone veneer, natural flagstone, pavers, pebbles, sand & gravel and so much more. The Stone Store is a division of Aggtrans; a leading supplier of aggregates in Maryland and surrounding areas for over thirty years. We take pride in being able to service our residential and commercial customers with all of aggregate and landscaping stone needs.

Visit our unique showroom and sprawling outdoor stone gardens and experience the natural beauty that stone can bring to any environment. Our team of highly trained experts are ready to help you visualize and plan your landscape, construction or decorating projects. At The Stone Store, we work together with homeowners, contractors, landscapers and architects to take the guesswork out of incorporating stone into your home improvement projects. Just give us a call at 1-888-766-4242 and we’ll do our best to assist you.

We take pride in building long lasting relationships with every customer. Taking time to explain and answer any questions that may arise is one reason why our service is the difference.

The Stone Store showroom is filled with portfolio samples from vendors. Our Stone Bar is stocked with samples of popular bulk materials. Customers are encouraged to take home samples to see which item is best suited for their home.
Welcome to The Stone Store, a premier supplier of natural stone, manufactured stone, bulk aggregates, interlocking paving, segmental walls and much more. Servicing areas in MD, DC, VA, PA, DE and beyond for over 30 years; we are committed to creating long lasting partnerships.

Part of this commitment has allowed us to establish direct relationships with quarries and suppliers throughout the world. These relationships have enabled us to offer one of the largest and most unique selections to our customers. Our never ending quest for material is based on craftsmanship, creativity, and quality but moreover our quest is servicing our clients needs. We take pride in bringing choices to our clients and assisting in material selection for building superior projects.

We are accessible for meetings at your facility, job sites, or at our headquarters. Featuring 20,000 square feet of display and showroom areas and a private conference room our headquarters are an ideal setting for client meetings. Employ US! The Stone Store as your premier resource in the industry – quality, choice and solutions are just the start of our dedication to excellence. Our team is comprised of top notch individuals who are both talented and passionate about serving the needs of our customers. Visit us to experience the difference!

Kimberly Himmel

Are you looking for something you don’t see in our catalog? While this catalog outlines much of the inventory we offer at The Stone Store, we are not limited to just these items. Ask your sales representative about other products available at The Stone Store.

©Aggtrans/The Stone Store, 2014. Unauthorized use and/or duplication of this catalog without express and written permission from Aggtrans/The Stone Store and/or owner is strictly prohibited.

Due to the nature of our earth's products: color, exact sizing and special characteristics cannot be guaranteed. Please be aware that colors and textures may appear different from the actual product when viewed on computer monitors, desktop printers and in print material. Please visit our Terms and Conditions page/product quality section for further details.
Wallstone is quarried or fieldstone material in its natural state, suitable for vertical stacking purposes. Wallstone is sorted typically by size range and divided into several categories including but not limited to; garden wallstone, thin wallstone, building stone, and building veneer. Wallstone can also be classified by shape, (ashlar, round, flat,) and /or texture (weathered). The Stone Store classifies wallstone products by size (1”-3”, 2”-4”, etc.). Wallstone is available at The Stone Store by the pallet, by the ton, and by the pound.

Due to the nature of our earth's products: color, exact sizing and special characteristics cannot be guaranteed. Please be aware that colors and textures may appear different from the actual product when viewed on computer monitors, desktop printers and in print material. Please visit our Terms and Conditions page/product quality section for further details.
Irregular Flagstone

Irregular flagstone is quarried flat stone material in its natural state and is typically used as paving slabs in flatwork applications (ie: patios, walkways). Material is split into layers creating pieces yielding a minimum of one flat side usually ranging 12” to 62” in surface area. Typically this flagstone is available in varying of thickness. Irregular Flagstone is quarried in places with bedded sedimentary rock including Arizona Flagstone and Pennsylvania Bluestone. The Stone Store classifies Irregular Flagstone products by type, and is packaged in “stand up” pallets or standard flat pallets. Irregular Flagstone is available at the Stone Store by the pallet, by the ton and by the pound.

Due to the nature of our earth’s products: color, exact sizing and special characteristics cannot be guaranteed. Please be aware that colors and textures may appear different from the actual product when viewed on computer monitors, desktop printers and in print material. Please visit our Terms and Conditions page/product quality section for further details.
Pattern Cut Flagstone is natural stone that has been selected and sawn to specific sizes or shapes. Standard dimensional sizes are typically available in multiples of six usually starting at 12” x 12”. Pattern cut material is usually cut to the ½” to allow for joint spacing. Color, texture, and surface finish of the stone will vary depending on type and source. Raw material is usually quarried in block which allows for a multitude of sizes and thicknesses. While paving or stonetile are the more popular applications for pattern material, it is also used in steps, counter/bar tops, and wall caps. The Stone Store classifies Pattern Cut Flagstone by type and it is sold by the pallet, each, or square foot. Special orders are available.

Due to the nature of our earth’s products: color, exact sizing and special characteristics cannot be guaranteed. Please be aware that colors and textures may appear different from the actual product when viewed on computer monitors, desktop printers and in print material. Please visit our Terms and Conditions page/product quality section for further details.
Bluestone

One of the most popular building materials regionally as well nationally, American Bluestone is a staple product at The Stone Store. Primarily quarried in South Central New York and Northeastern Pennsylvania, Bluestone is available in many shapes, sizes, cuts, and finishes... your imagination is the only limitation. Bluestone paving colors include full color (grays, browns, lilacs), blue select, and lilac (maroon/purple). Available in both natural and thermal finish, standard thickness ranges from ¾”-2” in both nominal (+- tolerance) and gauged thicknesses. In addition to paving material, American Bluestone is available in treads, sills, steps, and slabs. The Stone Store is recognized as an industry leader in supplying these products; from residential to commercial to municipal The Stone Store is your Bluestone resource.

Due to the nature of our earth’s products: color, exact sizing and special characteristics cannot be guaranteed. Please visit our Terms and Conditions page/product quality section for further details.
The Stone Store has one of the most unique and complete selections of boulders in the market. From small garden accent to large multiple ton specimen, our boulders have been used in projects for residential, commercial and municipal applications including passive barrier boulders used in many government facilities. River boulders, ledge stone boulders, lava rock boulders, and Rip Rap boulders are just a few of the available specimen boulders at The Stone Store. Boulders at The Stone Store are classified by type and packaged by the pallet or by the pound.

Due to the nature of our earth’s products: color, exact sizing and special characteristics cannot be guaranteed. Please be aware that colors and textures may appear different from the actual product when viewed on computer monitors, desktop printers and in print material. Please visit our Terms and Conditions page/product quality section for further details.
Natural steppers and slabs can be a key element to completing any landscape project. All-natural quarried and mined steppers and slabs from literally all over the globe can be found at The Stone Store... small garden path steppers, extra large diving rock slabs and everything in between. Choose from an abundance of sizes, colors and textures. Steppers and slab material is classified at the Stone Store by type and packaged by the pallet or by the pound.
Belgian Blocks are solid granite cubical shape cobblestones. One-hundred percent natural, durable solid rocks, Belgian Blocks are used in a variety of applications including paving and edging. Belgian Blocks are available in a small variety of color and several sizes and are available by the full pallet or by the each.

Manufactured Stone Veneer

Included in the manufactured stone veneer collections are StoneCraft and Dutch Quality Stone. StoneCraft’s stone profiles recreate all the fine detail of quarried stone at a fraction of the price, weight and installation time. Amish Craftsmanship is revered throughout the world and Dutch Quality Stone is located in the heart of one of the biggest Amish communities in America, which is one reason why Dutch Quality Stone is touted as the industry leader in quality and consistency. These products combine to give customers many choices at The Stone Store.

Basalt Products

Basalt Stones are natural rock formations created by the rapid cooling of lava on the earth’s surface millions of years ago. Unweathered basalt is black, but after thousands of years of weathering, many more beautiful colors evolve. Various lengths and sizes of basalt are popular in a variety of architectural and landscape uses. Stop in today to see our selection!

For more information on Basalt Stones please visit www.nps.gov/depo/index.htm.

Pride, professionalism, and safety are just a few words to describe the detail that goes into every Stone Store delivery. All deliveries are orchestrated by our dedicated dispatch team for both residential and commercial customers. The Stone Store is equipped with a fleet of vehicles, allowing us the ability to handle loads of all sizes. Our delivery personnel consists of highly-trained, service-minded professionals who go above and beyond to ensure our customers are treated with respect and all purchases delivered with care.

Due to the nature of our earth’s products: color, exact sizing and special characteristics cannot be guaranteed. Please be aware that colors and textures may appear different from the actual product when viewed on computer monitors, desktop printers and in print material. Please visit our Terms and Conditions page/product quality section for further details.
Services

The Stone Store strives to provide a level of service unmatched within the industry. The Stone Store extends its service thru value-added programs such as Stone Store University, an industry centric educational training program, and Stone Store Pro, a loyalty program designed to support contractors and hardscape industry professionals. In offering these programs and much more our customers’ success and satisfaction is our only goal. Our service is the difference.

#### General Formulas

- **Length x Width = Square Feet**
- **Square Feet x Depth = Cubic Feet**
- **Cubic Feet ÷ 27 = Cubic Yards**

When figuring quantities remember to:
1. Double-check your measurements
2. Allow for compaction (equals higher yield per CY)
3. Double-check your measurements
4. Allow for a waste factor
5. Always round up

#### Driveway or Pad Coverage

**How to calculate coverage for a standard driveway or pad**

**Example**

Standard driveway or pad to be covered with stone 6 inches deep:
- 15 feet x 25 feet = 375 square feet
- 375 feet x 0.50 (6 inch depth) = 187.5 cubic feet
- 187.5 ÷ 27 = 6.94 cubic yards (round up to 7 yards)

**How to calculate coverage for an L-shaped driveway or pad**

**Example**

L-shaped driveway or pad to be covered with stone 7 inches deep.

The calculation is done in two sections:
- 18 feet x 40 feet = 720 square feet
- 10 feet x 40 feet = 400 square feet
- 400 feet + 720 feet - 1,120 square feet
- 1,120 feet x .58 (7 inch depth) = 649.60 cubic feet
- 649.60 ÷ 27 = 24.06 cubic yards
Charts and Formulas

Calculating Circles

How to calculate the length around a circle
Formula: Diameter x 3.1416 = Linear Feet around Circle

Example
Length around an 18 foot diameter round swimming pool:
18 feet x 3.1416 = 56.55 feet (total linear feet around pool)
To add 2 feet of stone (3 inches deep) around this pool:
56.55 feet x 2 feet = 113.10 square feet
113.10 feet x .25 (3 inch deep) = 28.28 cubic feet
28.28 ÷ 27 = 1.05 cubic yards

How to calculate the square footage inside a circle
Formula: Length x Width x 0.7854 = Square Feet

Example
Square footage inside a 24 foot diameter round swimming pool:
24 feet x 24 feet = 576 square feet
576 feet x 0.7854 = 452.39 square feet (total inside pool)
To add 4 inches of sand evenly across pool:
452.39 feet x .33 (4 inches depth) = 149.29 cubic feet
149.29 ÷ 27 = 5.53 cubic yards
To be safe always round up. You would order 6 cubic yards of sand.

Any measurements, material take offs and/or material quantity estimates given by The Stone Store are NOT to be considered exact and are to be used for general estimating purposes only. Customer assumes the risk of any overages or shortages created by utilizing our general estimates and any such overages or shortages are the sole responsibility of the customer.
