

Brandt Welker Biography

Brandt Welker is the Chief Technology Officer at MedicaSoft where he leads the development and delivery of the MedicaSoft's next generation web scale EHR. Brandt previously worked at the U.S. Department of Veterans Affairs (VA), where he led healthcare innovations with the VA Center for Innovation. During his tenure with VA, he served as Chief Architect for Health IT in the Office of Enterprise Development and architected the Veterans Benefit Management System. Before joining VA, Brandt held a number of positions with the National Aeronautics and Space Administration (NASA), including Enterprise Architect for Exploration Systems and Extravehicular Activity Astronaut Trainer.
