Series D7 Pilot Devices

The economical solution for high performance control, signaling and switching applications

D7P – Plastic housing with a black plastic captive bezel.

D7M – Die-cast metal housing and locking ring with shiny metal captive bezel.

Sprecher + Schuh's rugged D7 pilot devices offer maximum flexibility and a wide choice for all applications. This 22mm line is aesthetically appealing and modularly designed to make assembly and interchangeability easy. The D7 operators are available in two different body styles to meet every application need. Both operators exhibit a new lower profile stylish appearance while maintaining the rugged performance necessary for demanding environments.

Two operator types

D7P is a plastic operator with a captive black plastic front bezel. Constructed of high-grade thermoplastics the D7P is the corrosion resistant solution for harsh environments.

For super tough applications, the D7M has a die-cast zinc housing and mounting ring for rugged durability. Both are finished with corrosion resistant chrome plating. The D7M also features a captive shiny metal bezel for a polished appearance.

Less inventory, more choices

Sprecher + Schuh offers D7 push-buttons in a wide range of devices — from selector switches to multi-function pushbuttons. Their modular design keeps the number of required parts to a minimum, while offering multiple functions and a variety of style and color combinations.

Back-of-panel components can be combined with all front elements, making the D7 line extremely flexible. This approach reduces inventory, yet provides virtually any configuration you require.

Quick, easy installation

A standard anti-rotation tab keeps front elements from turning or falling off the control panel, making it possible for one person to install all D7 components even if the front and rear panel are not accessible at the same time. A central mounting ring allows

for quick installation and removal of all D7 operators. All back-of-panel components including contact blocks and power module elements snap-on and are readily accessible and interchangeable without removing the pilot device from the panel.

Tool-less mounting latch

The D7 "tool-less" mounting latch mates the front element with the contact blocks and other back-of-panel components. The mounting latch is available in a plastic and metal design. The latches are easily installed with a "click" and removed by pushing a rotating collar to the right. Quick, reliable and strong, it's the best pilot device mounting latch available in the industry.

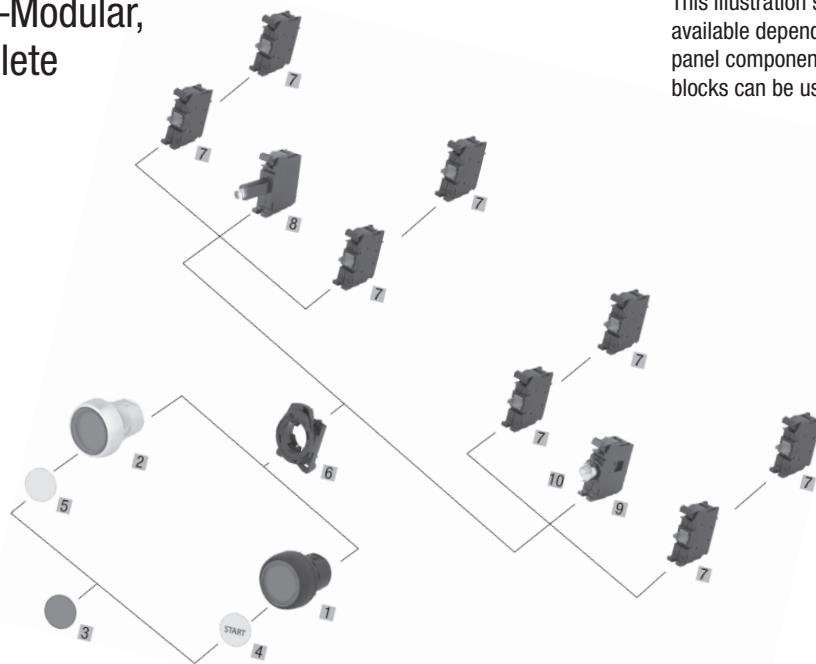

Long electrical and mechanical life

Most D7 operators have a mechanical life of ten million operations... five million contact blocks. Electrical life ranges from 500,000 cycles at 3A to ten million at 0.1A. The D7 line is also electronics compatible with self-cleaning contacts.

Environmental ratings

Front elements, including push-buttons, mushroom operators and selector switches, are IP 66 protection against submersion, oil and dirt, making them reliable in the toughest industrial environments. Metal operators are Type 4/13 and Type 4/4X/13 for plastic operators.

D7 Pilot Devices – Modular, flexible and complete

This illustration shows typical combinations available depending on the front and back-of-panel components chosen. Up to six contact blocks can be used on non-illuminated devices.

- 1 D7P Operator** – Corrosion resistant plastic construction with black plastic bezel
- 2 D7M Operator** – Metal construction with shiny metal bezel
- 3 Colored Lenses and Color Caps** – Available in many colors

- 4/5 Inscription Diffusers** – Diffusers and color caps available in many standard text and ISO symbol options, and foreign languages
- 6 Tool-less Mounting Latch** – For snap-on contact blocks and power module elements
- 7 Contact Blocks** – Five types available including NOEM, NCLB, and Low Voltage
- 8 Power Modules, Integral LED** – Full voltage module requires only one slot
- 9 Power Modules, Incandescent** – Full voltage module requires only one slot
- 10 Bulbs** – Incandescent and neon bulbs that include the incandescent power module

Additional features and options

Heavy-Duty Ratings – The D7 line is UL 46E, NEMA A600 and Q600 listed. All components carry a 10 Amp continuous current rating, covering all industrial control needs.

All Major Approvals – D7 front elements are UL Recognized, while all D7 assemblies are UL Approved. The line is also approved by every major international agency making them ideal for export requirements.

Special Contact Blocks & Power Modules – Screwless terminals are available for latching and base mounted contacts blocks & Integral LED modules. A latch mounted screw type dual circuit contact block is available.

H-Bridge & Gold Plated Contacts – By doubling the available paths for current to pass through the contacts, the standard H-bridge design provides a cleaner current flow. Gold plated contacts quadruple the current paths for increased contact reliability in low voltage applications.

Molded Inscription Caps/Diffusers – Abrasion proof inscription caps/diffusers are offered in a two-color molded design for most common inscription text and symbols used in the industry.

Custom Printed Caps/Diffusers – Durable long lasting custom printed inscription caps/diffusers are offered in a wide variety of ISO symbols and text options, and withstand repeated use in the harshest environments.

Touch-Safe – Back of panel components are finger safe, with IP 20 protection.

Long Lasting Integral LED Assemblies – Our LED lamps last up to 11 years! They are conveniently offered as a complete unit for all illuminated operators which include the one-piece Integral LED Module. They come in three different colors: green, red and white.

Full Line of Accessories and Enclosures – A variety of metal and plastic enclosures are available for any application. Replacement components, legend plates and convenient accessories are available from stock, including rings for adapting 30mm holes to fit the 22mm D7 line.

E-Stop Guardian™ Contact Blocks (D7-X01S)

Separation of the contact blocks from the front operator or mounting latch can prevent an E-Stop from shutting down the controlled process in an emergency. Proper contact block installation is critical to ensure that the normally closed contacts will open when the E-Stop is actuated.

Designed for critical control applications, Sprecher + Schuh's new Guardian Contact Block (GCB) monitors itself to assure it is properly installed on E-Stop operators.

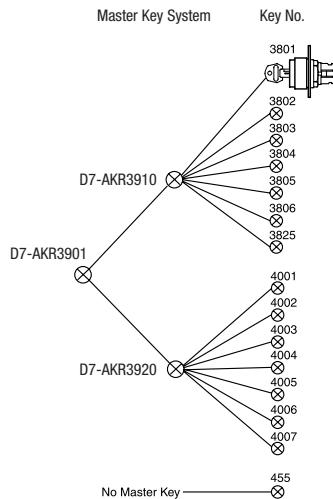

A normally open Guardian contact is physically molded and wired in series with a standard set of normally closed (NC) contacts. The normally open Guardian contacts automatically close when the contact block is properly installed on the E-Stop operator ①. In this state, the E-Stop and NC contacts operate as usual, with actuation of the E-Stop causing the NC contacts to open ②.

If the contact block should separate from the E-Stop operator, the normally open Guardian contacts will automatically open ③. Because the Guardian contacts are wired in series with the NC contacts, the opening of either set of contacts will open the circuit being controlled by the E-Stop.

Auer Signal

Panel Mount Beacons and Alarms

Long life LED lighting for enhanced indication and panel mounted alarms up to 105 dB

Beacons I at 65, 45 & 30 mm ø

M22 Alarms

Beacons with integrated alarms

Combine Light + Sound

The Series I beacons with alarm combine both light control and alarm signaling in one unit. Available in two sizes for mounting into a standard 22mm diameter panel hole. Choose the light and tone synchronized or separately controlled. Tones from 98 to 103 dB are easily selected via terminals.

Beacons

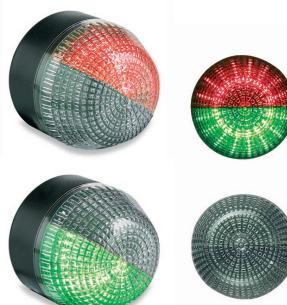

Auer Signal offers an array of panel mount beacons designed for 22 mm diameter mounting holes. These beacons offer incandescent bulbs or long lasting LED bulb options. Multi-faceted polycarbonate lenses offer an enhanced panel indication available in 12 V to 240 V AC/DC. Selections are available in Steady, Flashing Strobe, Multi-Strobe and Dual colors on the same unit. See the complete selection of Auer panel mount beacons starting on page J31.

Alarms

When a simple indicator is not enough, add a panel mount alarm. Auer Signal alarms mount into standard 22 mm diameter panel holes, right next to other pilot devices. In three sizes, and up to 105 dB of sound, signaling critical control issues is incorporated right into the panel door. Easily configured with DIP switches, choose from pulsing wobble or continuous tone options. And the 30 mm ESK model is fully enclosed, which is suitable for use in food industry applications. Auer panel mount alarms can be found on page J33.

Fits seamlessly into control panel along with other control devices.

Ordering Instructions

- Specify Catalog Number
- If applicable, add suffix from opposite page for complete Pushbutton Station assembly
- Total the list price of the pushbutton enclosure and the modification selected

- Accepts 2-piece snap-in legends. See panel hole spacing requirements on page H85. Inscription rings possible with 1-hole enclosure only.
- All "Complete Assembly" orders for two and three pilot devices should be accompanied by a sketch showing position of elements in enclosure.
- Will accept one stack of latch mount contact blocks (1-3 contact blocks).
- Will accept base mount and latch mount type contact blocks and power modules (1-3 contact blocks).
- To complete the catalog no., replace the x with one of the following letters for desired color:
Y = Yellow, R = Red, G = Green, B = Blue, W = White.

Complete Assemblies ②

Pushbutton Enclosures can either be purchased "stand alone," or completely outfitted with the standard pilot device combinations listed on the opposite page. Each enclosure accepts up to three contact blocks on each pilot device (one deep).

The Type 1 enclosure accepts standard latch mount contact blocks and power modules. The Type 4 and 4X enclosures accept base mount or latch mount contact blocks and lamp elements from this page, then turn to appropriate page to order pilot devices.

If purchasing components separately for self-assembly, order enclosure and, if necessary, base mount or latch mount contact blocks and lamp elements from this page, then turn to appropriate page to order pilot devices.

1. Select the cat. no. for the appropriate product and color from the Configurator Table above. 2. Add E100 followed by the font code (G, H, J), based on the maximum number of custom characters. 3. Complete the cat. no. by adding custom text to the order item's memo text or notes field. Example: Cat. No. D7-AF3CE100J FILL identifies a flush, green push button cap with custom printed text "FILL" in large font.	7.75	1

Font Size	Max. No. of Characters	Max. No. of Lines
G (small) (12 pt.)	7	1
H (standard) (16 pt.)	5...6	1
J (large) (20 pt.)	1...4	1

Custom Symbols/Graphics (Not found on pages H77...H79)	Price Each	Pkg. Qty.
1. Select the cat. no. or the appropriate product and color from the Configurator Tables on this page. 2. Add U100 to identify the custom symbol or graphic. 3. Please contact your local Sprecher + Schuh sales office to submit the graphic (in TIF/TIFF format). Example: Cat. No. D7-AD3CU100	7.75	1

- ① Package quantity of one for all standard custom printed caps and diffusers.
- ② Standard font is Arial Narrow
- ③ Font size is automatically determined by the number of characters. Seven characters maximum allowable.
- ④ Seven characters maximum allowable.

Material Listing

Component	For Use with	Material Used
Panel gasket	All operators	Nitrile, TPE
Diaphragm seal	Illuminated push button, non-illuminated push button	Automotive industry acceptable silicone
K-seal	Selector switch, key selector switch, push/twist-to-release E-stop, key E-stop, push/pull mushroom	Nitrile
Diaphragm retainer, return spring I	Illuminated push button, non-illuminated push button, momentary mushroom	Stainless steel
Return spring II	Reset, selector switch, key selector switch, maintained action, push/twist-to-release E-stop, key E-stop, push/pull mushroom	Zinc coated music wire
Button cap/mushroom head	Non-illuminated push button, momentary mushroom, reset, push/twist-to-release E-stop, key E-stop, push/pull mushroom, multi-function	PBT/polycarbonate blend
2-color molded button cap	Non-illuminated push button	PBT/polycarbonate blend
Lens	Multi-function	Acetal
Lens, knob	Illuminated push button, illuminated momentary mushroom, illuminated selector switch	Polyamide
Knob	Non-illuminated selector switch	Glass-filled polyamide
Plastic bezel/bushing I	Non-illuminated push button, illuminated push button, momentary mushroom, selector switch, key selector switch, push/twist-to-release E-stop, key E-stop, push/pull mushroom, multi-function, reset	Glass-filled polyamide
Plastic bezel/bushing II, jam nut	Pilot light, reset jam nut, reset pusher	Glass-filled PBT
Metal bezel/bushing	All metal operators	Zinc
Diffuser	Illuminated push button, pilot light	Polycarbonate
Legend frames	—	Glass-filled polyamide
Plastic mounting ring	All plastic operators	Glass-filled polyamide
Metal mounting ring	All metal operators	Chromated zinc
Plastic latch	—	Glass-filled polyamide
Metal latch	—	Chromated zinc + stainless steel
Plastic enclosure	—	PBT/polycarbonate blend
Metal enclosure	—	Aluminum
Terminal screws	LED module, incandescent module, contact blocks	Zinc-plated steel with chromate
Terminals	LED module, incandescent module, contact blocks	Brass with silver-nickel contacts
Screwless	LED module, incandescent module, contact blocks	Stainless steel
Lamp socket	Incandescent module	Brass
Housing	Incandescent module, LED module	Glass-filled polyamide
Low voltage terminals	Contact blocks	Gold plated silver-nickel contacts
Low voltage spanner	Contact blocks	Gold-plated silver-nickel contacts
Spanner	Contact blocks	Brass with silver-nickel contacts
Boot	Toggle Switch, illuminated push button, non-illuminated push button, multi-function illuminated an non-illuminated	Automotive industry acceptable silicone

Specifications

Mechanical Ratings

Vibration (assembled to panel)	Tested at 10...2000 Hz, 1.52 mm displacement (peak-to-peak) max./10 G max. for 3 hr duration, no damage		
Shock	Tested at 1/2 cycle sine wave for 11 ms; no damage at 100 G		
Degree of protection	IP 66 (Type 3/3R/4/4X/12/13)		
mechanical durability per EN 60947-5-1 (Annex C)	2,000,000 Cycles	Momentary Push Button	
	300,000 Cycles	Selector Switch and E-Stop/Push-Pull	
Operating forces	Flush/Extended = 9 N, E-stop = 36 N		
Operating torque (typical application with one contact block)	Selector Switch = 0.25 N•m		
Contact operation	N.O.	Slow double make and break	
	N.C.	Slow double make and break - positive opening 	
Push button travel to change electrical state	N.O.	2.5 mm (0.1 in.)	
	N.C.	1.5 mm (0.060 in.)	

 Positive Opening per EN60947-5-1 (applies to all NC contact block styles)

Electrical Ratings

Standard contact block ratings	B300, R300; AC 15, DC 13; 300 VAC; EN/IEC 60947-5-1 and UL 508, 17V, 5 mA min. (See page H84)			
LED Module Ratings	Nominal Voltage	Range	Nominal Current Draw	Frequency
	24V AC	20...26V AC	32 mA	50/60 Hz
	24V DC	18...30V DC	24 mA	DC
	120V AC	102...132V AC	22 mA	50/60 Hz
	240V AC	204...264V AC	22 mA	50/60 Hz
Thermal current	5 A max. enclosed (40°C ambient) to UL508, EN/IEC 60947-5-1			
Insulation voltage (Ui)	300V			
Wire capacity (screw terminal)	#18...14 AWG (0.75...2.5 mm ²), Max. (2) #14 AWG, uses same size wire only			
Recommendations for Ring Lug termination option 	6.35 mm (0.250 in.) Max. outer diameter with 3.8 mm (0.148 in.) hole diameter			
Recommended tightening torque on screw terminals	0.7...0.9 N•m (6...8 lb-in.)			
Dielectric strength (minimum)	2500V for one minute			
External short circuit protection	5 A type gL/gG cartridge fuse to EN 60269-2-1 or gN (Class J to UL 248-8 or Class CC to UL 248-4)			
Electrical shock protection	Finger-safe conforming to IP2X			

Illumination

LED Dominant Wavelength	Green	Red	Yellow	Blue	White
	525 nm	629 nm	590 nm	470 nm	
LED Luminous Intensity	Green	Red	Yellow	Blue	White

Incandescent maximum wattage 2.6 W

Materials

Springs	Stainless steel and zinc coated music wire				
Electrical contacts	Brass with silver-nickel contacts				
Terminals	Brass and phosphor bronze				
Panel gasket	nitrile and polyester-based TPE				
Seal	Nitrile				
Button cap/mushroom head	Polyester/polycarbonate blend				
Lens (pilot light)	Acrylic				
Knob (selector switch)	Glass-filled polyamide				
Bezel/bushing, housing	Glass filled polyester				
Legend frames	Glass filled polyamide				
Mounting ring	Glass filled polyamide				
Terminal screws	Zinc-plated steel with chromate				
Lamp Socket	Brass and Phosphor bronze				

Product Certifications

Certifications	UL, CSA, CCC, CE
Conformity to standards - CE marked	UL 508, EN ISO13850, EN 60947-1, EN 60947-5-1, EN 60947-5-5
Terminal Identification	EN/IEC 60947-1

 Operating temperatures below 0°C (32°F) are based on the absence of freezing moisture and liquids.
