

CNC Upgrade

FAGOR
AUTOMATION

Open
to your
world

Update your CNC and reduce your machining time of up to 30%

At Fagor Automation we offer a promotion to update your CNC and improve the efficiency of your machines, optimizing the quality and precision of your products.

EXCLUSIVE PROMOTION FOR USERS

Up to 30% reduction in machining times.

Update of the control system with new processors. This will reduce machining time by up to 30% and improve the precision of your parts. Additionally, the new machining algorithms will greatly improve overall performance.

Parts with better surface finishes.

The machining algorithms smooth the machine's movements, extending the life of your mechanics. You will achieve better pieces with better surface finishes, minimizing polishing and final finishing work.

Reduce programming times & increase your productivity.

The most user-friendly conversational programming system available, it enables the programming of complex operations within seconds, all without requiring any ISO programming expertise.

Machine connectivity for third party hardware and i4.0

With their Ethernet and USB connections, our systems are ready for seamless integration into your company and Industry 4.0 settings.

**For equipment currently in operation*

At our school, we are enhancing our machining workshop's digitalization with the **Fagor Digital Suite**. After upgrading an unconnected CNC, it now connects, **executes cycles faster**, improves part finishing, and simplifies programming for students.

Ainara Sedano
Larraitz Zubeldia
Tolosaldea Lanbide Heziketa

We **upgraded** a CNC machine that we had for over 15 years. By mid-morning, the technician had the new, faster CNC running, keeping the same operations for the operator. We can now transfer programs via **USB**, enhancing our efficiency.

Ainara Sedano
Sales Director
Talleres Altube

We are a **family business** in constant renewal and updating. That is why the commitment for years has been to install Fagor Automation products in all the machines and to have a **maintenance service contract** for all our equipment. Their response time and **technical service are excellent**.
