

Bose Sound System

A wireless Bose speaker is located in the Loft. To connect, turn on the speaker, and be sure the Bluetooth indicator is blinking blue (ready to connect). If not, push the Bluetooth/AUX button. Make sure to enable Bluetooth on your device and select the Bose device from your Bluetooth options. While devices are connecting, the Bluetooth indicator will blink white and will change to steady white once connected.

If your device won't connect, hold the Bluetooth button on the Bose speaker for approximately 10 seconds, until you hear a beep.
