

Join the SCIEX lunch seminar
Monday, June 22 | 12:20 p.m.
Visit us at Booth #P3

Is your workflow giving you answers or just data?

Kick off Metabolomics 2026 with a proof-driven
lunch seminar featuring Nicola Zamboni and
Vinicius Verri Hernandez

Confidence you can see.

From routine runs to deeper insight, with more answers per sample.

Speaker highlights:

Vinicius Verri Hernandez
Senior Scientist ,
University of Vienna,
Austria

Learn how exposomics-driven metabolomics can
**link environmental and lifestyle exposures to
measurable small-molecule signatures,**
supporting exposure biology and biomarker
discovery in population studies.

Nicola Zamboni
Adjunct Professor,
Institute of Molecular Systems
Biology, ETH Zurich

Explore how advances in metabolomics and
lipidomics are enabling **confident interpretation**
and **data quality that holds up as studies scale.**

See how proof-led, workflow-ready
performance can strengthen small-molecule
analysis as your science evolves.

Skeptics welcome.
