- Letters to a Pre-Scientist (LPS) [Home Page](#)
- Nuclear Waste Dialogue (NuWaDi) [Home Page](#) (possibly may have small grant opportunities as Jennifer was inquiring about unless they have already completed their grant cycle)

Hi all,

I want to piggyback on Ann's email to share that the Letters to a PreScientist (LPS) program is opening applications for interested teachers very soon. This is a pen pal program where students are matched up with STEM professionals for one year (4 letters for each participant).

They are particularly looking for **middle school teachers in rural schools** who may be interested, so I hope those of you involved with the K12 educators could please share! It is not nuclear-specific, but a neat program nonetheless.

Teachers who are interested should sign up for the mailing list here: <https://prescientist.org/for-teachers/>

Thanks!

Sarah
