HOW TO GET STARTED

With XT-2000 Orange Oil Plus®

XT-2000 Orange Oil Plus is for drywood termites, carpenter ants, wood-boring beetles is made from a naturally occurring essential oil containing the active ingredient, 95% pure d-limonene, a derivative of the citrus rind. **When injected directly into wood, it wicks through the wood killing pest, termites, their eggs and larvae on contact via liquid and wicking vapors.**

Here's what you'll need to know in order to be successful with our product:

Call now to schedule your free training!

Proper Equipments:

Equipment makes a difference!

- XT-2000 is best applied using a one gallon B&G sprayer.
- There are three tip options optimized for different applications.
 - Having a 7/64", 7/16", 3/8", 5/32" of drill bits on hand is key.
- State law requires using a scope or other device to make visible or remove in order to clear for Escrow and/or home warranties.

For more information on all equipments, please check our product page at www.pestweb.com or www.xt2000.com today!
