

# KFI002 Automated Head Assembly Kit With Fertilizer Injector

## Introduction

The KFI002 Automated Head Assembly Kit With Fertilizer Injector is designed to offer an all-in-one head assembly ideal for beginners and experts alike. This head assembly kit comes with all the standard parts required to run an effective drip irrigation system using .700 OD ½” poly drip tubing off of a standard ¾” garden hose or hose spigot. It also includes a battery-powered timer to turn the system on and off for you automatically, and a DIG Add-It fertilizer injector to make fertilizing your garden as easy as possible.

## Description

This kit includes the following quantities and items:

1x C002 battery-operated timer

1x A015 backflow device

1x FI001 fertilizer injector

1x F300 155 mesh polyester screen filter

1x PR204 25 psi pressure regulator

1x LF003 .700 OD poly tubing adapter

## Assembly

Connect the parts in the order shown above by screwing them together until they are hand tight. Use the picture on the next page as a reference:

### Tips & Tricks

1. Do not use tools to tighten the parts in this kit as that may break them
2. Always make sure to put the timer first, upstream of all the other components. Putting the other components before the timer will cause them to leak and break
3. You do not need to use teflon tape or any other kind of thread sealant on the parts included in this kit
