

AUTOMATED TANK CLEANING SOLUTION

GREENHOUSE / AGRICULTURAL / HORTICULTURAL

Vorso is an automated tank cleaning solution for horticultural and agricultural batch irrigation tanks and nutrient storage tanks. Vorso utilizes German-engineered stainless steel cleaning nozzles and high-quality actuated ball valves to deliver a robust Clean-In-Place (CIP) system.

Automated drain, clean, and rinse cycles can be easily integrated into existing irrigation and fertigation control systems or installed as a standalone system. Manual systems are also available.

LABOR SAVINGS

Automation keeps your tanks consistently clean with little room for human error.

SYSTEM INTEGRATION

Vorso easily integrates with existing control systems, from the simplest irrigation timers to the most complex full-facility fertigation system.

SAFETY

Automated tank cleaning removes the need for using ladders in a wet environment, reducing safety concerns.

OSHA COMPLIANT

CIP systems remove laborers from confined spaces and hazardous tank environments.
