Our T-shirt quilts are different than the traditional design of uniformly sized squares set in rows and columns with sashing between the squares.

We do not use a standard design for quilts so each one is unique.

Your T-shirts are cut into various sized blocks that fit the logo of the T-shirt and the blocks are sewn together in a collage style design.

The quilt is then machine quilted.

We want your T-shirt to be soft, so we make each one without sashing or iron-on interfacing.

Here's How We Make T-Shirt Quilts:

- We allow any number of T-shirts for your quilt.
- The quilt backing and binding is a solid color of your choice.
- We give you a written estimate and let you know the estimated date of completion.
- Once the shirts logos are cut, we draw a map of your quilt in a computer-drafting program and assign a placement for each of your T-shirt blocks. If there is a significant in size change from the estimate we will contact you. You may then decide if you want to change the size or bring more t-shirts.
- Your blocks are then sewn together and the layers are machine quilted. The quilt is finished with a binding that matches the backing fabric. We will then notify you to come pick up your quilt. That's the best part!

The price includes the batting, backing fabric, binding fabric and thread.

The price is determined by the size of the finished quilt.

To determine the price, add the width of the quilt plus the length of the quilt and multiply the sum by \$3.10. For example, a quilt which is 40" wide and 60" long is \$310.

That is $40 + 60 = 100 \times \$3.10 = \310 .

EXAMPLE SIZES ,..., Your quilt may be different than listed.

	Finished Size	# of Shirts	Price
Lap	52" x 68"	15 - 25	\$372
Twin	60" x 84" 84"	25 - 30	\$447
Full	x 92" 92" x	30 - 40	\$546
Queen	100" 100" x	40 - 60	\$596
King	112"	60-80	\$655
