

Commercial Two Door Worktop / Under Bench Fridge 800mm Depth

Designed for hospitality venues where both bench and fridge space are required. This two-door stainless-steel workbench refrigerator is designed to keep products within easy reach and can be used as either a worktop or be built under a bench. With self-closing doors that keep contents fresh and adjustable shelves that will each accommodate a full patisserie tray or pan (600mm x 400mm), the full 390L storage capacity is conserved with the inclusion of a unique centre shelf connector that allows you to use the entire shelf space.

This unit operates at up to 43°C ambient temperatures and has automatic defrosting and fan-forced ventilated cooling powered by a Cubigel compressor.

The X-series has been designed with dual fans located at the front and side of the unit. This design frees up the rear ventilation space, allowing you to position these models flush against the back wall. All you are required for ventilation is to provide 150mm at the side and the front clear from obstructions.

R290 Refrigerant is non-toxic, natural, and free of ozone-depleting properties. R290 is one of the most climate-friendly and cost-effective refrigerants available. Fridges and Freezers using this refrigerant are more efficient and can reduce your overall energy costs by up to 28%.

When you buy from AG Equipment, you know you are getting a twenty-four-month parts and labour warranty from a trusted Australian supplier.

Carel iJF Controller

The new iJF controller is by CAREL, which has more than thirty years of experience in the refrigeration controller market. Customisation options, aesthetics and functionalities have been considered when commissioning the controller. Its frameless flat design and distinctive appearance blend perfectly into any fridge or freezer appliance.

- Provides Logs
- Fault alarm warnings
- Mobile connectivity with Controlla Application through Bluetooth
