- Solenoid valve
- Stainless steel AISI304(14301) Body

Description

Bezzera Semi Professional Espresso Coffee Machine BZ10

The model BZ10 is practical and economical and can be installed anywhere without connections to a water supply net, thanks to a boiler system with a heat exchanger and the practical groups heating system cappuccinos coffee and tea can be produced for a large community. The group is heated by 2 cartridge heating elements controlled by a thermostat to maintain a constant temperature.

Works with a vibration pump and delivery groups with a solenoid valve. The group is controlled by a push button, that activates a vibration pump and opens the group solenoid valve to deliver coffee, once the desired quantity is reached; by pressing the push button again, the group stops.

Key Features:

- Electrical heating, 2 cartridge heating elements
