Dr.Coffee F11 Series

The F11 series perfectly embodies the principle that "concentration is the essence," featuring a compact and exquisite design along with a noble and elegant appearance. It is suitable for various high-end business environments, such as VIP centers, offices, and lounge areas.

The patent dual-compatible brewing system, with intelligent pressure regulation, high-pressure extraction for espresso, and low-pressure simulation for hand-brewed coffee, meets the different taste demands of Americano and espresso.

The delicate and smooth high-temperature milk frothing system, coupled with an automatic cleaning design, ensures that your milk foam is not only finer and smoother but also makes the cleaning process of the coffee machine more convenient and worry-free.

The fully automatic quick rinse system, equipped with a self-cleaning feature for the coffee machine, ensures that your milk system is always clean, providing fresh milk with every cup.

The 500kg grinding long-life ceramic flat burrs ensure uniform particle size with low noise and efficient heat dissipation design, which better brings out the unique taste characteristics of the coffee.

Feature

Dual Pump System	—
Iced Coffee	—
Superheated Water	—
Customized Coffee	●
One-Touch Milk Coffee	●
Barreled Water	●
Tap water Supply	○
Scheduled Milk Cleaning	●
IoT Mobile Payment	○

Technical sheet

Water Tank Capacity (L)	2/8
Bean Hopper Capacity (g)	1200*1
Grounds box capacity (g)	70
Display orientation (Lateral)	7.0"
Rated voltage (V)	220-240
Rated frequency (Hz)	50/60
Rated power (W)	1500
Machine weight (kg)	15.5
Machine L*W*H (cm)	30*50*58

Capacity

Advised daily output (cups)	100
Hot water hourly output (L)	15
Hourly output (cups)	70
