

BWT Combi Oven Water Filters WFC3500

Quick Overview

- Ideal for steam generation in combi steamers, ovens, and steam cookers
- Removes particles, flavour-inhibiting substances, and the taste of chlorine from the water
- Protects expensive equipment and appliances against limescale and gypsum deposits
- Minimizes the risk of corrosion by stabilizing the pH value
- Capacity (L to 120ppm): 3500

Description

BWT Combi Oven Water Filters WFC3500

Key Features

BWT Bestprotect filters provide excellent protection for the equipment used to produce hot drinks and kitchen equipment in the food service sector. For example, natural water with a high salt content may cause corrosion problems or lead to scale and gypsum deposits (calcium sulfate). Bestprotect filter cartridges feature an exceptional filter medium and high-end BWT technology to provide your machine technology with the best possible protection. In addition, the cartridges are specially designed to achieve an optimum pH value and an excellent water mineral balance – both crucial factors in great-tasting coffee and espresso. Benefits at a glance:

- Ideal for steam generation in combi steamers, ovens, and steam cookers
- Removes particles, flavour-inhibiting substances, and the taste of chlorine from the water
- Protects expensive equipment and appliances against limescale and gypsum deposits
- Minimizes the risk of corrosion by stabilizing the pH value
- Capacity (L to 120ppm): 3500

Filter Starter Kit includes

- Water filter – 3500L, Connection, Filter head – One head fits all cartridges,
- Water pressure limiting valve, Flush valve – Fits on the outlet of the head

Replacement Cartridge
