

USER MAINTENANCE

GREASE RAIDER G15 & G25 AUTOMATIC GREASE REMOVAL UNIT

Filter Basket and FOG Capture Container

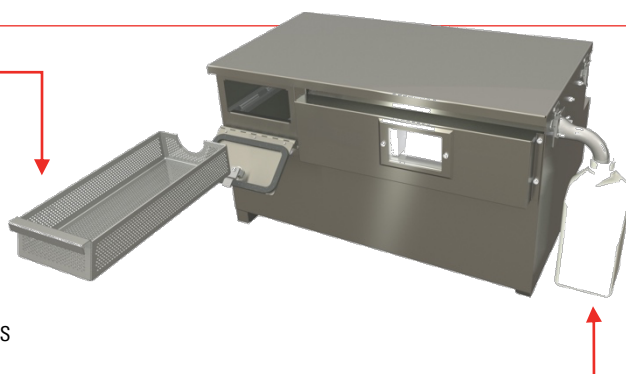

The filter basket should be cleaned daily. Remove the basket and empty the contents to a waste bin. The disposable FOG collection container should be emptied as required, but typically daily. Remove to a waste bin.

DAILY

Open door and remove filter basket

- Empty contents to waste bin
- Clean and replace
- Close door

Remove FOG collection container (old milk bottles are ideal to use) and put in waste bin.

Wiper Blade and Roller

The wiper blade should be cleaned weekly. Remove the lid and wipe across the wiper blade with a paper towel or cloth. Ensure that the wiper chute is clear of any solids and that the chute outlet is not blocked.

The wiper chute can be removed for additional cleaning by lifting out while sliding toward the front of the unit. Reverse the process to replace.

WEEKLY

Remove lid and clean the wiper blade

- Use a paper towel or cloth
- Ensure the wiper chute is clear of solids
- Ensure the chute outlet is not blocked

Keep solids out of the unit. This is important to ensure the efficient operation of the extraction process and prevent any build-up of solids in the waste chute or chute outlet.
