

IARP STILL SLIM

Compact plug-in refrigerated display cabinet for drinks, cured meats and dairy products

Overview

The IARP Still Slim is a compact upright refrigerated display cabinet designed for sales/display of beverages, cured meats and dairy products. It is intended for commercial plug-in use where a narrow footprint and high product visibility are required.

Description

Still Slim uses ventilated refrigeration for greater temperature stability, single-stop/off-cycle defrosting and a mechanical thermostat. A full glass door improves product visibility, while R600a refrigerant, double vertical LED lighting, five adjustable shelves and a standard lock support day-to-day retail merchandising. The range is available in black and white aesthetics with optional sticker personalisation of the sides and door.
