# LIEBHERR

## Features

### High impact product presentation

The energy-saving LED interior lighting provides the ideal presentation of the products stored

### Environmentally friendly refrigerants

Liebherr appliances are optimised for maximum energy efficiency and low operating costs. We only use the natural and environmentally-friendly refrigerants R 600a and R 290. When used with highly efficient compressors, these are extraordinarily efficient and, with their low global warming potential, also future-proof.

### Temperature alarm

The integrated temperature alarm indicates if the lower or upper alarm thresholds have been breached. It uses both acoustic and visual signals to provide maximum security for goods that have been stored.

### NoFrost technology

No need to defrost: Liebherr's NoFrost technology provides outstanding freezing performance for professional-standard, long-term freshness. To ensure that the freezer always remains ice-free and that food does not frost over, food is frozen using circulating chilled air and any moisture is removed.

### Efficient refrigeration system

Liebherr guarantees the outstanding quality of its refrigeration systems through expertise derived from decades of experience in the refrigeration technology sector, and through continuous research and development. By employing only premium-quality compressors, condensers, evaporators and other refrigeration components the energy consumption and operating costs of Liebherr appliances are significantly reduced.

### Forced air cooling

Highly efficient fans cool freshly stored produce quickly and maintain an even refrigeration temperature throughout the interior.

## Technical drawing
