RONDO
Dough-how & more.

Simple, fast and efficient:

Artisanal pastry production in a
minimum of space.

How do you create more space? By optimising how it is used.

Space and time are often in short supply in an artisanal bakery. RONDO offers solutions for efficient pastry production that can also be accommodated in small bakeries.

The RONDO Cutomat or RONDO cutting table handle the intricate cutting of dough sheets. You and your staff have more time to fill, fold and decorate the pastries.

Whether they are square, round, triangular or in shapes you have designed – the dough pieces always have a regular shape, size and weight, thus ensuring constant quality.

You can trust RONDO machines. Decades of experience have gone into their creation. A strong passion for dough processing. Ideas coupled with perfected technology. Elaborate ergonomics and high durability. Just typical of RONDO – dough-how & more.

flexible
economical
versatile
space-saving

How do you make sheeting and cutting more efficient? By combining them.

The RONDO Cutomat is a dough sheeter with integrated cutting station – the perfect solution when the available space is limited. In five simple steps, you process all types of dough to create fine pastries of first-class quality – efficiently, uniformly and reliably.

Rondostar-Cutomat
Electronic dough sheeter and cutter with colour touchscreen programs for any pastry.

Rondonat-Cutomat
Mechanical dough sheeter and cutter, combines ergonomics with performance capability and hygiene.

Manomat-Cutomat and Automat-Cutomat
Mechanical dough sheeter and cutter for the highest performance requirements. The Manomat-Cutomat has manual roller adjustment and the Automat-Cutomat has automatic roller adjustment.

The right Cutomat for every requirement
The mechanical Rondonat-Cutomat combines ergonomics with performance capability and hygiene.

The Manomat-Cutomat and Automat-Cutomat are designed for the highest demands with regard to performance. The Automat-Cutomat has an automatic roller adjustment that always guarantees the same rolling steps. On the Manomat-Cutomat, these are set manually.

The electronic Rondostar-Cutomat makes your pastry production even more efficient: you save a program for each pastry. The colour touchscreen and easily comprehensible symbols make operation very easy.

Low space requirement
Both machine tables can be folded up, which means the machine is easy to move, freeing up valuable space for other work.

Sturdy cutting station
The twin cutting station can be operated conveniently from the front. You adapt the cutting pressure individually to the dough. Counter-pressure rollers under the synthetic conveyor belt guarantee clean cutting with a minimum of pressure.

Simple cleaning
All Cutomats have smooth surfaces and practically no visible screws or bolts. Thanks to the modern design and the proven scraper system, you clean the machine quickly and easily without the need for tools.

Five simple steps

1. The dough is sheeted gently.
2. You switch to cutting speed.
3. You activate the cutters.
4. The dough sheet is cut to the desired shape.
5. You fill and fold the pastries on the outfeed conveyor belt.

How does your production become more efficient? With a well-balanced team.

The RONDO dough sheeters and cutting table complement one another perfectly. Together, they form a versatile artisanal production line. On the cutting table, you cut the dough sheet into various shapes. At the same time, you can already be processing the next block of dough on the dough sheeter. That saves time and increases your productivity.

Four time-saving steps

1. The dough is sheeted and reeled gently on the dough sheeter.
2. You place the dough sheet on the cutting table, where it is unreeled again.
3. The dough sheet is cut to the desired shape.
4. You fill and fold the pastries on the cutting table.

Durable and stable

The sturdy stainless-steel construction of the dough sheeters and cutting tables guarantees a long service life. You have a choice between cutting tables of 2.6 m and 3.6 m in length. They are also optionally available with variable speed.

Transfer tables for delicate types of dough

Doughs that cannot be reeled or are sticky or crumbly can be transported directly to the cutting table on the practical transfer table.

Efficient production of croissants

Do you produce croissants? If you do, you'll know that manual curling takes up a lot of time. With our Rondinette curling device, you produce croissants in various sizes – quickly and efficiently. Triangles of dough cut on the cutting table or the Cutomat are simply placed on the infeed belt of Rondinette and loosely curled.

How is pastry kept uniform at all times? With a perfect cut.

The RONDO cutters create dough pieces in various shapes from your dough sheet quickly and easily – always the same size, the same weight and the same shape. With the comprehensive assortment of cutters, you put your ideas into practice with perfect precision, uniformity and diversity.

Rectangular and square

Cross and length cutters create the basis for a great many folded pastries.

Well-rounded decoration

Using round and oval cutters with plain or scalloped edges.

Donuts

Using round or ring cutters.

Special shapes

Using tandem cutters.

Perfect croissants

Using zig-zag and length cutters.

Occasional shapes

Using hand cutters for triangles, squares, rectangles and round items.
