PROFESSIONAL PARRILLA 675/670

FEATURES | BENEFITS

PARRILLA 675: SINGLE MODULE
Professional BBQ Brazilian Grill composed of a single module (grill and fire lighter together).

PARRILLA 670: CUSTOMIZED BY MODULES
Professional BBQ Brazilian Grill composed with independent modules (grill + fire lighter).

THERMAL INSULATION
The heat is kept in the fire lighter with door and thermal insulator, generating coal savings compared to conventional masonry equipment. Opening front protection that facilitates handling of coal.

MANUAL GRILL OPERATION
Manual up/down elevation of grills through the front wheel. Front wheel with anti-reverse technology. It allows independent front wheels, without mixing the different grill types.

READY TO USE
No masonry construction required.

HIGH QUALITY
Equipment designed and built with high quality to provide the best barbecue performance and greater durability in professional use.

GRILLS OPTIONS
Standard with V shaped Grills made of carbon steel. Upper rest grill for vegetable and meats. Options in Stainless Steel V-shape, Stainless Steel or carbon round bars.

CLEANING
Equipment coated in brushed stainless steel 304 or 430 stainless steel with castors to displacement and removable grills that facilitates the operation and cleaning.
