

Integrated Syrup Rail Option

2 room temperature with lids & ladles, 2 heated with syrup pumps

Item No. _____

C712

Soft Serve Freezer

Twin Twist, Pump

Features

Offers all the popular soft serve variations from low or non-fat ice creams, to custards, yogurt, and sorbet. Serve two separate soft serve flavors or an equal combination of both in a twist.

Freezing Cylinder

Two, 3.4 quart (3.2 liter).

Mix Hopper

Two, 20 quart (18.9 liter). Simplified air/mix pumps deliver the precise amount of air and mix to the freezing cylinders and reduce operator parts. Separate hopper refrigeration (SHR) maintains mix below 41°F (5°C) during Auto and Standby modes.

Indicator Lights

Digital readout displays hours since last brush-cleaning to ensure product safety. Mix Low light alerts operator to add mix. Audible alarm may be enabled to sound when mix is low. When the Mix Out light flashes, the unit shuts down automatically to prevent damage.

Touch Screen Controls

Microprocessor touch controls are embedded in a durable tempered glass panel. Multiple languages are selectable. Viscosity is continually measured to dispense consistent quality soft serve desserts. Temperatures in the hoppers or freezing cylinders may be displayed at any point of operation, in either Fahrenheit or Celsius. Draw counter allows operator to view number of servings dispensed.

Standby

During long no-use periods, the Standby feature maintains safe product temperatures in the mix hopper and freezing cylinder.

Two Locking Casters

Front casters have a locking feature for operators to keep equipment in place. The lock can be released to move the equipment for cleaning.

Door Interlock System

Protects the operator from injury as the beater will not operate without the dispensing door in place.

Freezer Door

A specially designed thermoplastic door allows quick ejection of product with a simple movement of the draw handle. Self-closing draw handles are standard.

Options:

All options may not be available in combination with others or with all electrical or cooling configurations. Please consult your local Taylor distributor.

Authorized Taylor Distributor

Specifications

Electrical

Two dedicated electrical connections are required. See the electrical chart for the proper electrical requirements. Manufactured to be permanently connected. Consult your local Taylor distributor for cord and receptacle specifications as local codes allow.

Beater Motor

Two, 1.5 hp.

Refrigeration System

Two, 10,100 BTU/hr. R449A. Separate Hopper Refrigeration (SHR), one, 400 BTU/hr. R134a. (BTUs may vary depending on compressor used.)

Air-Cooled

Minimum 3" (76 mm) around all sides. Install the deflector provided to prevent recirculation of warm air. Minimum air clearances must be met to ensure adequate airflow for optimum performance.

Water-Cooled

Water inlet and drain connections underside of base 1/2" FPT.

Accessories

- Cone Dispenser
- Drain Adaptor (for ease of rinsing and cleaning)
- Draw Valve Lock Kit
- Faucet
- Hopper Locks
- Syrup Rail Kit (side mount)

Options

- Hopper Agitators
- Panel Spinner
- Syrup Rail (integrated)
