Installation

Installation requirements

1. Installation and connection of your Zip HydroTap must be carried out by a Zip Certified service technician, observing national and local regulations.

2. You will require suitable mains electrical and drinking water connections, plus waste water drainage all within 1 metre of the product.

3. Zip HydroTap is air-cooled so discrete cabinetry cut-outs are required for ventilation.

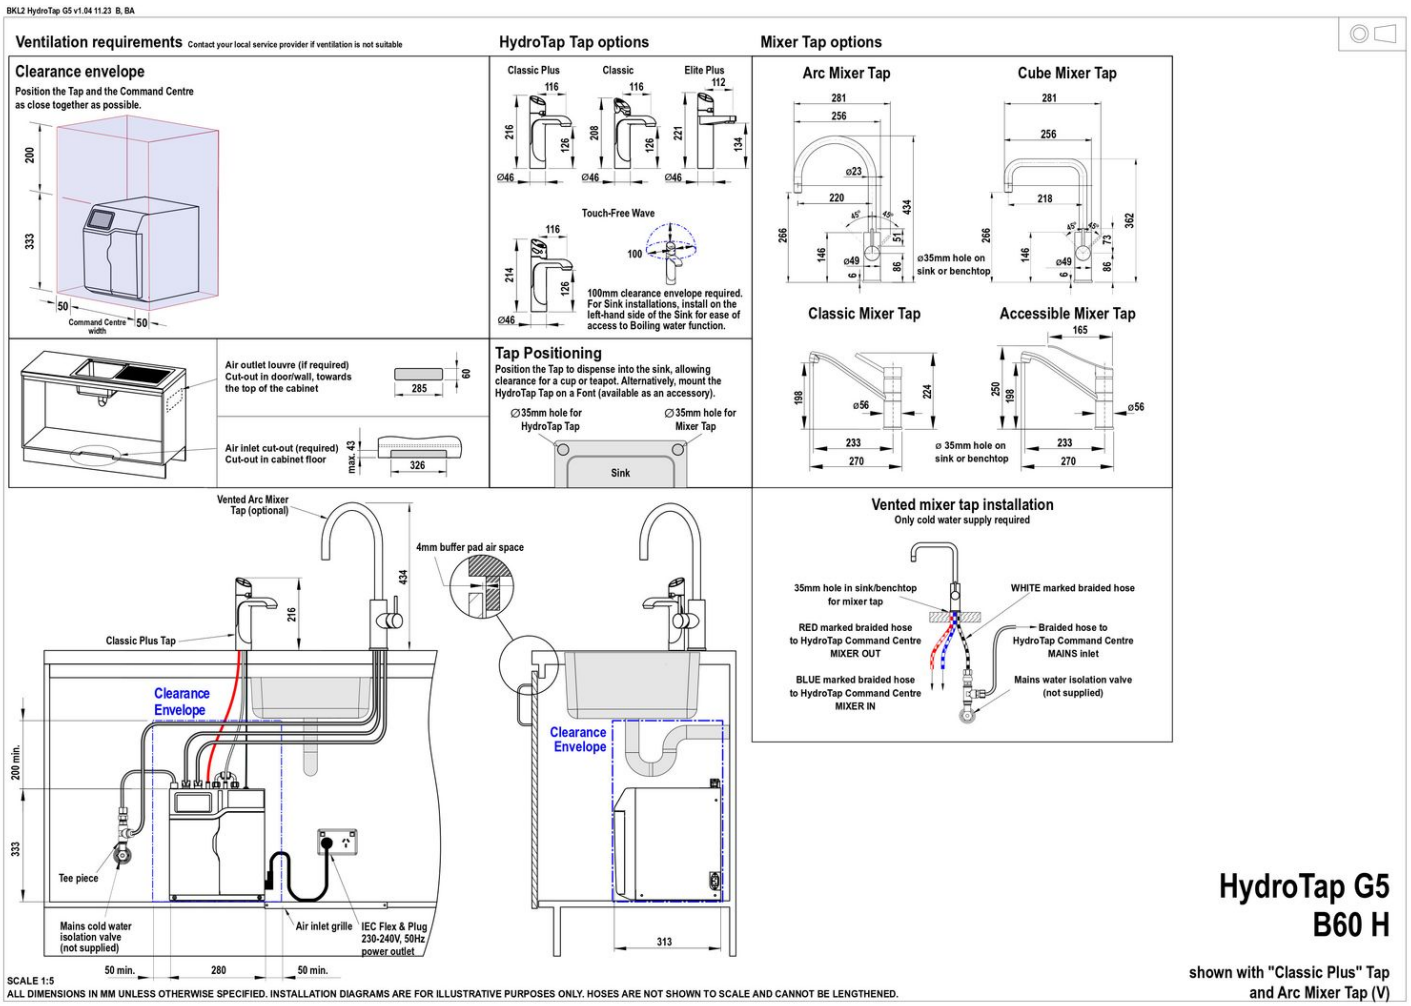

4. Installation on most bench tops is straightforward however some stone bench tops may require a specialised cutting service.

5. If you live in a hard water area, we recommend installation of a scale filtration kit.

6. Installation by Zip Professional Service can be arranged with a phone call or through www.zipwater.com/book-service-visit
