

ecocanopy™ SACRA Exhaust Hood

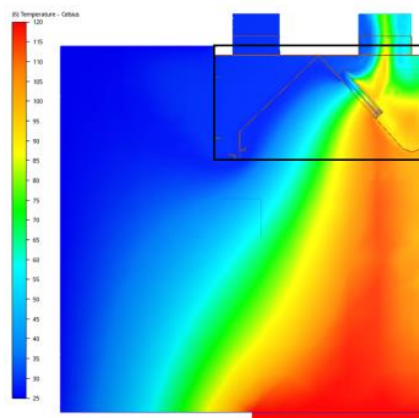

ecocanopy™ SACRA

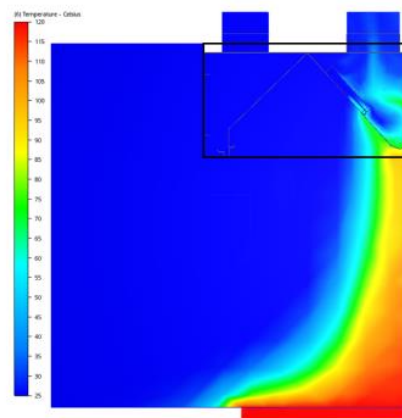

Introduction

The SACRA exhaust hood with ecoaircurtain™ technology is a highly efficient kitchen ventilation hood that removes soiled air and excess heat emitted by cooking equipment. The SACRA exhaust hood requires approximately 30% less exhaust air volume flow than traditional hoods. This reduces overall energy consumption and allows supplementary filtration systems such as UV, HEPA and Carbon to react better with the effluent air.

WITHOUT ecoaircurtain™

WITH ecoaircurtain™

How it works

As the grease and heat laden air rises up, it is gently guided by the ecoaircurtain away from the chef and towards the ecoshield™ Baffle filters. This ensures effluent air is extracted out and does not escape into the kitchen environment. SACRA hoods require lower air volume flow rates as the canopy is not relying solely on the force of the extraction to capture the effluent air. This results in a quieter hood and less energy wastage.

Specifications

Sizes: L= 1000mm - Unlimited, W=1000 - 1900mm, H=400 - 800mm (*custom heights and tapers also available*)

Material: 1.2mm 304 No.4 S/S

Lighting: 36W LED Batten with high temperature glass diffuser

The ecocanopy™ SACRA exhaust hood is a *full stainless steel* fabricated *CodeMark approved* canopy, designed and manufactured in Australia.
