Lutz eccentric screw pumps

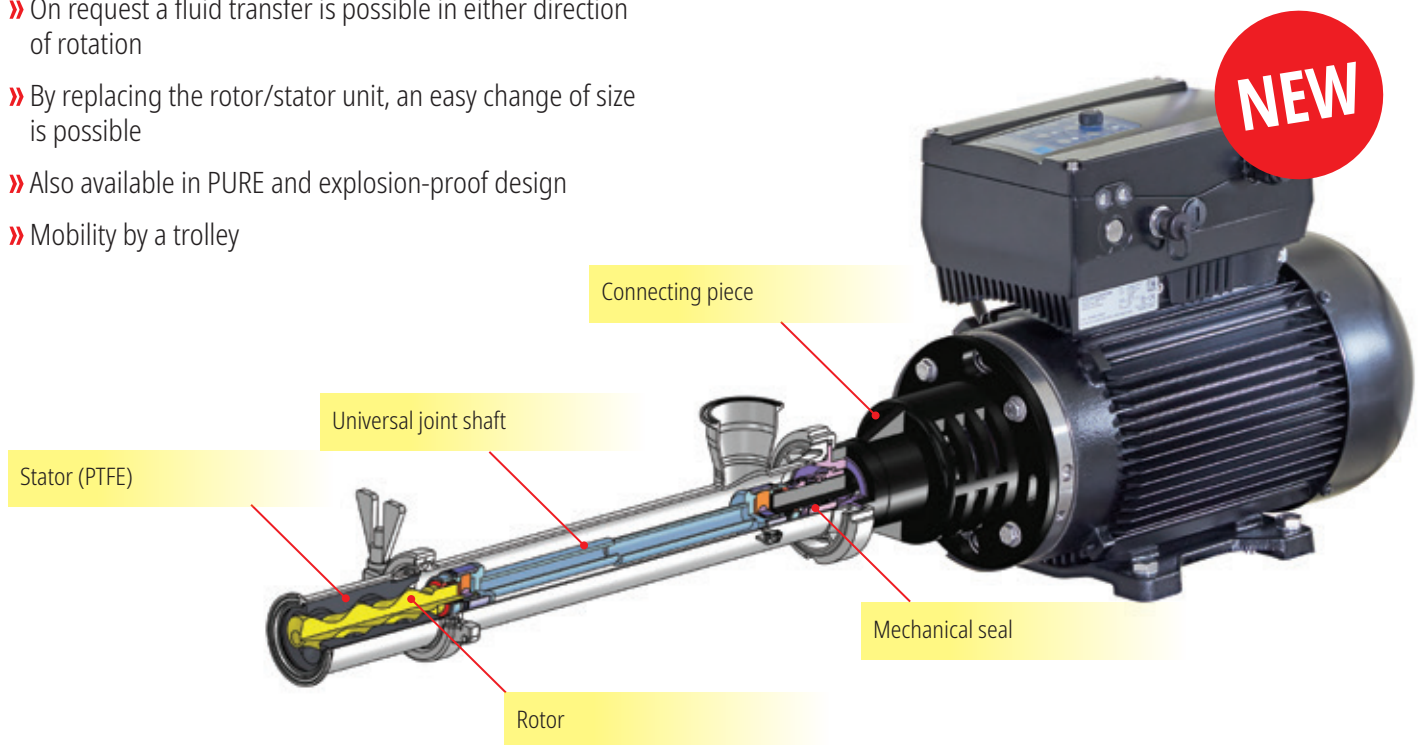

B70H Series

The H stands for horizontal!

The B70H is a variation of our B70V and is designed for the horizontal use on a trolley. It can be used in situations where the B70V comes across space limits or limits of handling and thus completes our range of eccentric screw pumps with a mobile version.

Features/Benefits

- » By positioning outside of the container, it is possible to pump liquid out of the stacked containers - or containers which are not accessible from the top
- » Due to the compact construction height, emptying at limited room height is possible
- » Easy handling of heavy pumps
- » No physical strain due to lifting
- » Easy replacement of wearing parts by the new rotor/stator combination
- » On request a fluid transfer is possible in either direction of rotation
- » By replacing the rotor/stator unit, an easy change of size is possible
- » Also available in PURE and explosion-proof design
- » Mobility by a trolley

Optional with stainless steel trolley with normal or conductive wheels. In conjunction with a flow meter and operating unit, a mobile filling station is created.

Easy change of size

- Changing between different stator materials is possible with the same stator sleeve.
- A conversion from 25.1 to 75.1 is possible by replacing the stator sleeve.
- The pump tube and shaft are always the same length and compatible with each rotor/stator unit.
- By replacing stator, rotor and stator sleeve, a conversion to any rotor/stator combination is possible.

Liquid examples

Lutz horizontal eccentric screw pumps are suitable for pumping aqueous to highly viscous Newtonian and non-Newtonian media. The pumps are suitable for abrasive, solids containing and shear sensitive media, as well as for neutral, aggressive and easy flammable liquids under high delivery pressure.

B70H 25.1 and 75.1

For viscosities of 100.000 mPas

Materials (coming into contact with the pumped medium):

Version:	B70H 25.1	B70H 75.1
Housing:	Stainless steel (1.4571/1.4404)	Stainless steel (1.4571/1.4404)
Rotor:	Stainless steel (1.4571)	Stainless steel (1.4571)
Seals*:	FPM	FPM
Mechanical seal*:	Carbon/CrMo-casting, FPM	Carbon/CrMo-casting, FPM
Drive shaft:	Stainless steel (1.4571)	Stainless steel (1.4571)
Stator materials:	PTFE	PTFE

Other sealing materials on request

Pump tube with stator in PTFE is also available in PURE version. Special application in the food and cosmetics industry as well as in the pharmaceuticals.

Important info

Range of viscosity aqueous up to flowability limit.
