BACKFILL TAMPERS & SAND RAMMERS TOOLS

- Perfect for compacting in soil and sand applications
- Built to withstand heavy use in tough environments
- Seal design keeps internal components free from dirt and grit

CHIPPING HAMMERS

- Top choice for light demolition work, including concrete and masonry removal
- Hard-hitting, well balanced tool
- Variety of sizes, capacities, and precision matched accessories provide the best tool to the job

DIGGERS

- Great for medium to heavy density earth or rock-laden earth, and light to heavy demolition
- Time tested valve durability in dusty conditions
- Available in multiple retainer configurations
- Extra-long nozzles provide increased longevity

JACKHAMMERS & ROCKDRILLS

- Simon Ingersoll invented the world's first rockdrill
- Perfect for either wet or dry drilling
- Applications include blast holes, post holes and anchor holes
- Three series to choose what's right for your job

LARGE DRILLS

- Ideal for opening and closing large valves or drilling large diameter holes
- Lighter, smaller, and more powerful than electric drills
- No brushes or switches to be maintained
- Variety of available attachments

PAVEMENT BREAKERS

- Top choice for resurfacing and demolition
- Specifically designed with fewer parts to deliver lower operating costs
- Composite materials used to eliminate rust and ensure consistent performance
- Internal lubricator for continuous tool protection

RIVET BUSTERS

- Great for a variety of applications ranging from rivet removal, tank cutting, and general brick or concrete demolition

SPIKE DRIVERS

- Productivity of a large tool with less weight
- Transfer 20 percent more blow energy to the spike than traditional tools

STEEL & ACCESSORIES

Offering top-quality steels and accessories specifically designed to complement our entire product line. Sockets, tool steels, abrasives and surface prep accessories, sanding and polishing pads, carbide grinding burrs as well as air line accessories such as hoses, gauges, inlets, oilers and hose whips.
