

# Engraving Pens & Pencil Grinders

## 8135 MARKING PEN

High frequency pneumatic handheld engraving pen used for marking welds, hardened tool steels, plastic, glass, and other materials. Equipped with a standard medium needle tip (39862-2), finer (39862-1), and courser (39862-3) needles are available.

- Medium Needle Tip Radius = .010
- Fine Needle Tip Radius = .005
- Course Needle Tip Radius = .015

## 140EP ENGRAVING PEN

Designed with durability in mind, the 140EP accurately engraves even the hardest surfaces with ease. This versatile pen is great for marking tools and other pieces of equipment, allowing for easier identification and reduced cycle times.

- Ergonomically designed with a soft rubber grip and slender body ideal for extended use
- Price point provides a great value to the customer, an affordable yet reliable tool

## EP50/EP50K ENGRAVING PEN

With three assorted styluses (fine, medium and course) and a knurled zoom throttle for positive control, the carbide-tipped styluses of the EP50 Series will let you engrave even the smallest details.

- Steel housing to dampen vibration and a flexible hose for easy movement
- Also offered in a kit (EP50K) includes Model EP50 Engraving Pen, medium stylus flexible Hose (DG100-130: 6' x 3/16"), 3 assorted styluses (Fine, Medium, Coarse), and molded plastic carrying case

## 320PG/320PGK PENCIL GRINDER

Complete with a custom TPU grip, low vibration and noise, and an oversized speed control knob, the 320PG was designed for enhanced user comfort and safety.

- 320PG allows for more tasks with a singular tool for maximum versatility and productivity
- Affordability which provides high quality performance at a budget-conscious price point.
- Also offered in a kit (320PGK): includes the tool, 5 assorted mounted points, 5 assorted carbide burrs, and hard case (kit pictured below)
