

MT8 PRO SERIES METERING

Maximum Flow Rate: 8.00 gph (30.28 lph)
 Minimum Flow Rate: 0.06 gph (0.227 lph)
 Maximum Pressure: 3500 psi (241 bar) for Metallic Pump Heads
 350 psi (24 bar) for Non-metallic Pump Heads

WANNER™ HYDRA-CELL® PRO METERING PUMP SOLUTIONS

Hydra-Cell Pro Metering Solutions pumps exceed API 675 performance standards for Steady-State Accuracy ($\pm 1\%$), Linearity ($\pm 3\%$), and Repeatability ($\pm 3\%$).

MT8 with Stainless Steel pump head

Triplex metering pump with “pulse-free” linear flow.

- Multiple-diaphragm design provides smooth, linear, virtually pulse-free flow without the need for expensive pulsation dampeners.
- Designed for low flow rates at high or low-to-medium pressures.
- Can run dry indefinitely without damage to the pump in the event of a blocked suction line or other conditions.
- Features simple-to-replace cartridge check valves with double-sealing surfaces.
- Electronic flow control increases accuracy and reliability.
- Available with manual flow adjustment that can be used in hazardous areas or for local flow control.
- The integral relief valve protects the pump from over pressurization on the discharge side.
- Handles a variety of processing fluids.
- One pump covers a wide range of flows and pressures – reducing inventory requirements with fast, simple field conversion.
- Duplexing option doubles capacity and equipment savings.
- Hydraulically-actuated, balanced diaphragms provide superior performance across the entire pressure range.
- Seal-less design means no seals, cups, or packing to leak or replace.
- The patented overfill/underfill valve system ensures optimum actuating oil on every stroke for continuous accuracy and protects the pump and diaphragms.
- Rugged construction with sealing oil cap.
- Smaller footprint saves valuable space.

* Flow rates above 8 gph are not guaranteed to meet API 675 Performance Standards; therefore, pump rpm should be limited to 315 at 350 psi and 352 at 1500 psi when using a 5:1 gear reducer and 1800 rpm motor. To reach 8 gph at pressures above 1700 psi with the same reducer and motor, the VFD will need to be programmed for operation above 60 Hz.

* Flow rates above 30.28 lph are not guaranteed to meet API 675 Performance Standards. To reach a flow rate of 30.28 lph with a 5:1 gear box and 1500 rpm motor, the VFD will need to be programmed for operation above 50 Hz.

Please Note: Systems vary. The MT8 pump must be calibrated once installed to ensure optimum performance. The API 675 Performance Standard is achievable for flow rates as low as 0.06 gph (or 0.227 lph). Please contact the factory for assistance.

Maximum Flow at Designated Pressure for Pumps with Manual Variable Speed Gearbox

- Minimum flow rate of 0.06 gph (0.227 lph) can be achieved at a Manual Dial Setting of 0.1.
- Flow rates above 8 gph (30.28 lph) are not guaranteed to meet API 675 Performance Standards.
- Only use motors (1/2-hp or 0.37 kW) with turndown ratios to match the appropriate range of applications.

MT8 Pro Metering Pump | Specifications

MT8 Triplex Metering Pump Applications

Designed for low flow rates at high pressures, the groundbreaking MT8 metering pump is ideal for a variety of applications:

- Chemical Metering & Injection
- Food & Beverage Processing
- High-pressure Chemical Reaction
- High-pressure Process Chromatography
- Oil & Gas (offshore and onshore)
- Personal Care Product Manufacturing
- Pharmaceutical Manufacturing
- Plastics Processing
- Polyurethane Foam Production
- Power Plant/Boiler Feed
- Water & Wastewater Treatment

MT8 Duplexing Option

Two MT8 pumps can be run with only one gearbox and one motor. This “duplexing” option doubles capacity with a smaller footprint and lower investment cost than conventional metering pumps.
