

Explosion Proof Diaphragm Pump

Classified for Explosive Environments

Remote control
of dosing rate

Flow: Up to 600 GPD (94.6 LPH)

Pressure: Up to 300 PSIG (21 BAR)

NSF/ANSI 61 & 372 WQA Tested and
Certified for safe drinking water

Class I, Div 1, Groups C, D, T5
Class I, Zone 1, Group IIB T5

- Ideal for chemical dosing applications that require remote control in hazardous locations
- Meets Hazardous location rating, for facilities that deal with hazardous material in the environment such as flammable gases
- Aluminum housing is rugged and is designed for high corrosion resistance
- Integrated automatic controls: 4-20mA input or external pulse input integrated on Pulsatron X control panel eliminates the need for extra device and external enclosure
- Manual control with on-line adjustable stroke rate and stroke length
- Simple substitution of competitors in the field - No need to re-drill mounting holes

Pulsatron X is built on the foundation of the industry leading Pulsatron Series of pumps known for high reliability, easy maintenance, and lasting performance providing years of dependable service.

A Pulsatron pump for any Application
