## Metering Pump

# DATA SHEET

### Manual, Enhanced, and Communications Models

The EXCEL<sup>®</sup> XR metering pump is a mechanically actuated diaphragm pump driven by advanced variable speed stepper motor to provide the most accurate and reliable performance in the industry. This proven technology is easy to maintain and will provide years of maximum up-time service. Available in three control configurations, Manual, Enhanced, and Communications Models, the EXCEL XR pump fits seamlessly into the process control requirements of every application. The Manual model is the entry level model with two digital inputs, the Enhanced model provides a full range of capabilities, and the Communications model offers Profibus DP or Modbus RTU communication protocols for 2-way communication. All models come standard with a color backlit display, multi-language options and remote operation options. The EXCEL XR metering pump provides everything you need for complete control of your process.

### Applications
