

HHLF

1-1/2" or 2" x 1-1/2" or 2" High Head Low Flow Self Priming Centrifugal Pump

HHLF (High Head Low Flow) "HR" high pressure self-priming centrifugal pumps meet USCG specifications for auxiliary fire control (46 CFR compliant) and is ABS type approved.

The high suction centerline and impeller design eliminates premature priming loss while ensuring consistent priming capability. The HHLF pump is capable of achieving up to 25 feet suction lift.

The HHLF series is available close coupled to NEMA "C" Face electric motors or as PumPAKs®. The engine drive models are capable of close coupling to both gasoline and diesel engines with 1" keyed drive shafts. Pedestal mounted pumps are also available.

The volute and impeller are removable and easily replaced.
