BEER PUMPS 5 Series

DESCRIPTION: The March beer pump is a non-self-priming magnetic drive unit built specifically to handle hot wort and water. The unit requires liquid being pumped to lubricate the internal parts. If the pump is run dry for a period of time the impeller and shaft may become damaged. To regulate the flow use a valve on the discharge/outlet.

ELECTRICAL: AC-5B-MD and AC-5SSB-MD have an air cooled 1 phase motor that is either 115 Volt or 230 Volt, 50/60 Hz and a 3 ft. cord. TE-5SSB-MD has a dual 115/230 Volt, 50/60 Hz, 1 phase TEFC motor with a conduit box.

LIMITED WARRANTY: March pumps are guaranteed only against defects in workmanship or materials for a period of one year from date of manufacture pumping water. Register online at www.marchpump.com/warranty-registration
