MXR®

CALIBER CONVERTIBLE SUBMACHINE GUN

MXR® FEATURES

ONE WEAPON, ANY MISSION!®

The compact, lightweight and reliable FightLite® MXR® leads the submachine gun arena with an accurate and ruggedized weapon that streamlines user and agency logistics for improved mission capability. Patented features and smart product design reduce operator burden by providing complete ammunition and magazine interchangeability between the user's primary sidearm and their pistol caliber MXR® carbine.

The patented MXR® is primarily chambered in 9 x 19mm NATO and is caliber convertible at the user level without tools to accommodate 7 different calibers including .22LR for cost effective training, 5.7 x 28mm for high velocity trajectory with armor piercing capability at short to medium ranges, and 10 x 25mm Auto for hard-hitting terminal performance. Principally configured with Glock® pattern magazines, the FightLite® MXR® is also convertible at the user level to accept common pistol magazines from a variety of manufacturers including Beretta®, S&W®, Sig Sauer®, FN®, CZ®, Walther® and others.

The MXR® ambidextrous reciprocating charging handle and ambidextrous controls with 3-position pictogram selector markings provide the advantages of ergonomic user interface and integral bolt forward assist, with the ability to quietly chamber and confirm loaded round. Engineered and produced in the USA of aerospace grade materials combined with high-impact polymer components for a lifetime of hard use; the MXR® monolithic receiver features either MIL-STD 1913 or STANAG 4694 NATO Accessory Rails (NAR) at the 6 and 12 o'clock positions and Magpul® M-LOK interfaces at 3 and 9 o'clock positions for optimum strength and accessory retention.

Configured with time-proven blowback operation from a closed bolt and a quick-change threaded barrel for suppressor use; the MXR® can be field stripped in seconds without tools to provide for easy takedown, maintenance, and mission-specific configuration. Further MXR® customization is provided with use of an M16/M4 compatible fire control group, pistol grip and receiver extension (buffer) tube interfaces to suit user preferences and ergonomics.

Available in semi-automatic pistol, carbine and select-fire submachine gun models suitable for law enforcement and military use. MXR® - One Weapon, ANY Mission!®

SPECIFICATIONS

ORIGIN:
United States of America

CALIBER:
9 x 19 mm NATO / Multi-Cal

OPERATION:
Closed Bolt, Blowback

FIRE MODE:
Semi-Automatic or Select-Fire

WEIGHT:
4.25 lbs (1.93 kgs)

OVERALL LENGTH:
20.75 - 22.75" (527 - 578 mm)

BARREL LENGTH:
(a) 5" (127 mm) Threaded 1/2 x 28
(b) 7" (178 mm) Threaded 1/2 x 28

MUZZLE DEVICE:
A2 Flash Hider

HEIGHT:
6.75" (171 mm)

WIDTH:
2.25" (57 mm)

SIGHT / OPTIC INTERFACE:
MIL-STD 1913 OR STANAG 4694

ACCESSORY INTERFACE:
M-LOK

PISTOL GRIP:
Magpul® MOE-Grip

BUTT STOCK:
Magpul® SLK or MOE

MAGAZINE:
Glock® Pattern

MAGAZINE RELEASE:
Ambidextrous L / R

SAFETY SELECTOR:
Ambidextrous L / R

COMPACT MODULARITY

- Fast and Tool-Free Barrel, Caliber, and Magazine Pattern Conversion
- Completely Ambidextrous Safety, Charging Handle, Mag-Release, And Bolt Release
- Monolithic Receiver with Type III, Class 2 Hardcoat Anodized Finish
