IP Video Intercom System

Simple. Effective. Versatile.

The IP-based video intercom system is an all-encompassing solution for any property, residential or commercial. With features that dip into the realms of video surveillance, access control, call forwarding, and even home automation, this is a complete and expandable system with a pricepoint to accomodate any budget.

- Video entry capability featuring 7" touch-screen monitors, running Android OS 4.4
- Ability to ring up to 5 monitors at once in one apartment/home
- Monitor the outdoor camera feed at any time from the monitors.
- Ability to integrate additional IP surveillance cameras
- Model # NT-IP-G9W-S monitor includes SIP server access to forward calls to a registered account in your VoIP softphone of choice.
- Unlocking capabilities - compatible with electric locks up to 3.5 amp vDC (or AC with external dry-contact relay)
- Communicates with smart home systems using RS-485 communication
- POE compatible monitors and door panels available
- Built-in SD-card reader allows for expandable storage up to 32GB in each monitor
- Ability to manage systems across multiple buildings with available management software
