

TekTone AM100/36

Add-on Panel, 36 Light/Buttons with Test Button

Description

The TekTone AM100/36 Add-on Panel is an expansion annunciator panel for the DS100 Door Sentry & Emergency Alarm System. It provides 36 annunciator light/buttons and includes a lamp test button. The panel expands the capacity of a DS100 master annunciator, allowing additional monitored zones to be displayed. Multiple AM100-series add-on panels can be connected to a single DS100 master to increase system capacity.

Features

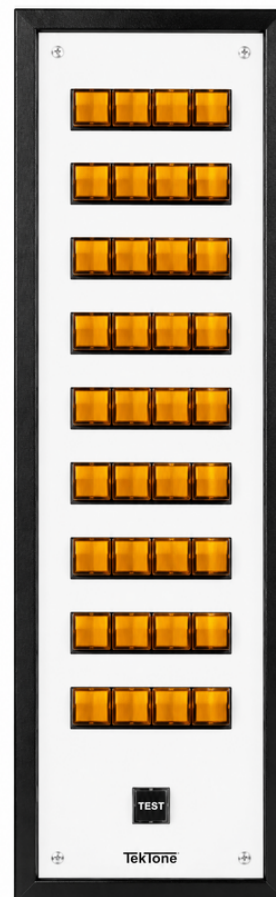

- 36 annunciator light/buttons
- Integrated lamp test button
- Removable annunciator lenses for easy identification
- Flush-mounted modular panel construction
- Expands DS100 system monitoring capacity
- Up to eight AM100-series add-on panels can be connected to one DS100 master panel
- Available as a parallel annunciation version by adding the "P" suffix to the model number (special order)

Applications

- Expansion of DS100 Door Sentry & Emergency Alarm Systems
- Door monitoring
- Window monitoring
- Monitoring devices with normally open or normally closed contact switches
- Emergency push button monitoring
- Nursing homes
- Assisted living facilities
- Facilities requiring additional alarm annunciation points

Compatible Systems

- DS100 Door Monitoring & Emergency Alarm System
- PK2019A Power & Control Unit
- SS106 Transformer
- OH200-series Flush Housing
- OF200-series Frame
- OH300-series Surface Housing
- IH300-series Desk Housing

AM100/36
