

TekTone CM800/20

Speaker Panel with 20 Lights, Tone-Off Button/Light, and Test Button

Description

The CM800/20 is a master speaker panel designed for centralized visual and audible annunciation in emergency call and security monitoring systems. Built in a durable extruded aluminum housing, it provides multi-zone status tracking with 20 indicator lamps, an integrated speaker for audible signaling, a tone-off button with an indicator light, and a system test button.

Features

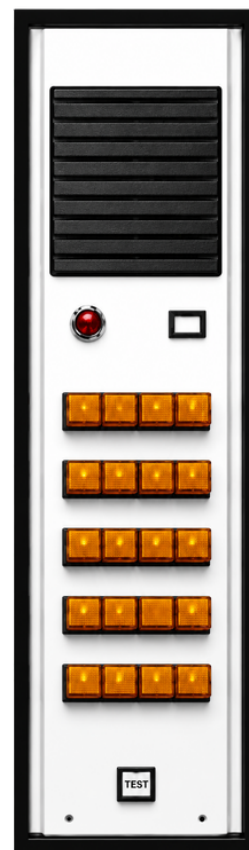

- **20 Zone Indicator Lights:** Delivers clear visual signaling for up to 20 separate stations or zones.
- **Modular Expansion:** Can be combined with add-on indicator panels to expand total system capacity.
- **Versatile Mounting:** Supports surface or flush mounting in horizontal or vertical orientations.
- **Durable Construction:** Features an extruded aluminum housing for reliable commercial use.
- **Customizable Zone Labels:** Allows custom designations using dry transfer lettering or standard labels.

Applications

- Assisted living facilities and nursing homes
- Emergency call and nurse call system monitoring
- Security alarm display panels
- Commercial and educational facility status signaling

Compatible Systems

- TekTone CM800 Series Emergency Call Systems
- PK2019A Power & Control Unit
- SS106 Transformer
- AM800 Series Add-On Annunciator Panels
- SF118/2C Series Emergency Stations
