

## TekTone CM800/4

### Speaker Panel with 4 Lights, Tone-Off Button/Light, and Test Button

#### Description

The CM800/4 is a modular master speaker panel designed for visual and audible annunciation in emergency call and security systems. Constructed with an extruded aluminum housing, it provides centralized status monitoring with 4 indicator lamps, a built-in speaker, a tone-off button with indicator light, and a system test button.

#### Features

- **4 Zone Indicator Lights:** Delivers clear visual signaling for up to 4 separate stations or zones.
- **Modular Expansion:** Can be combined with add-on indicator panels to expand total system capacity.
- **Versatile Mounting:** Supports surface or flush mounting in horizontal or vertical orientations.
- **Durable Construction:** Features an extruded aluminum housing for reliable commercial use.
- **Customizable Zone Labels:** Allows custom designations using dry transfer lettering or standard labels.

#### Applications

- Assisted living facilities and nursing homes
- Emergency call and nurse call system monitoring
- Security alarm display panels
- Commercial and educational facility status signaling

#### Compatible Systems

- TekTone CM800 Series Emergency Call Systems
- PK2019A Power & Control Unit
- SS106 Transformer
- AM800 Series Add-On Annunciator Panels
- SF118/2C Series Emergency Stations

TekTone CM800-4  
4-Zone Annunciator Panel

#### Technical Specifications

- **Power Requirements:** 16–24 VAC or VDC
- **Capacity:** 4 Zone Lamps
- **Housing Material:** Extruded Aluminum
- **Mounting Type:** Surface or Flush Mount (Vertical or Horizontal)
- **Audible Signal:** Internal buzzer with output for optional external signals

#### UL Listing Information

- UL 1069 Listed: Approved for Hospital Signaling and Nurse Call Equipment when configured as part of a complete TekTone system.
