

TekTone LS120

Tek-CARE®120 Connectivity License

Description

The LS120 is a software-based connectivity license for the Tek-CARE® Appliance Server / NC475 Central Equipment. It enables the Tek-CARE Appliance Server to import and process call events, alarms, and system data directly from connected Tek-CARE®120 Nurse Call Systems.

Features

- Software connectivity license for integrating Tek-CARE®120 system activity.
- Enables the Tek-CARE Appliance Server to import events from Tek-CARE120 systems.
- Integrates call events, alert notifications, and system statuses into the central Tek-CARE network.
- Allows event monitoring, mobile app reporting, and system notification dispatch through the central platform.

Applications

- Integration of Tek-CARE®120 Nurse Call System hardware into TekTone's central equipment platform for centralized and decentralized event monitoring.
- Used in hospitals, nursing homes, assisted living facilities, and other healthcare environments.

Compatible Systems

- Tek-CARE®120 Nurse Call System
- NC475 Tek-CARE® Appliance Server / Central Equipment

Technical Specifications

- Model: LS120
- Type: System Connectivity License (Software Module)
- Host Hardware: NC475 Tek-CARE Appliance Server / Central Equipment
- Function: Imports events from Tek-CARE120 Nurse Call Systems

UL Listing Information

The LS120 is a software connectivity license intended for use as part of a compliant Tek-CARE system configuration; please refer to the primary system equipment documentation (e.g., NC475 Central Equipment / Tek-CARE®120 system components) for overall UL 1069 and UL 2560 listing details.
