

TekTone NC110/8

Master Panel with 8 Lights & Test Button

Description

The NC110/8 is a 8-point master panel configuration for the Tek-CARE® NC110 Audible-Visual Nurse Call System. The NC110 system provides audible and visual call indication without intercom communications. The master panel works with room call stations, emergency call stations, dome lights, zone lights, control equipment, and power-supply equipment.

Features

- 8 station selector lights.
- Electronic DC buzzer.
- Tone Off and Tone Test functions.
- Emergency and routine call signaling.
- Modular design.
- Protected markings.
- Emergency calls take precedence over routine calls.
- Lamp Test function illuminates all panel lamps when pressed

Applications

- Audible-visual nurse call systems where intercom communication is not required.
- Healthcare facilities requiring centralized indication of routine and emergency calls.
- Nurse call installations using up to 8 monitored station points on this master-panel configuration.

Compatible Systems

- Tek-CARE® NC110 Nurse Call System
- AM110-series Annunciator Add-On Panels
- NC110-series Master Annunciator Panels
- OH200-series Flush Housings
- OF200-series Frames
- SF-series Call Stations
