

TekTone OF201

Frame, 1 Gang (1 Panel Wide)

Description

The TekTone OF201 is a flush-mount aluminum frame designed for one-gang (one-panel-wide) TekTone annunciator and control panels. It is used with compatible OH201 flush housings to provide a finished installation for nurse call, emergency call, and annunciator systems.

Features

- Heavy-duty extruded aluminum construction.
- Natural aluminum finish.
- Designed for flush-mount installations.
- Accommodates one panel (1 gang).
- Compatible with TekTone OH201 flush housing.
- Used with TekTone annunciator and master panel assemblies.

Applications

- TekTone nurse call master annunciator panels.
- Emergency call system annunciators.
- Flush-mounted control and annunciator panel installations.
- Healthcare, assisted living, and commercial communication systems.

Compatible Systems

- NC110-Series Master Annunciator Panels
- AM110-Series Add-On Panels
- DS100 Door Sentry & Emergency Alarm System annunciator panels
- Compatible with OH201 Flush Housing and other TekTone one-panel-wide annunciator assemblies.
