

TekTone[®] RP187K

Gasket Kit for SF123 Station Installation in Wet Environments (Pack of 5)

Description

The RP187K Gasket Kit consists of water-resistant gaskets designed for use with the SF123 Customizable 2-Button Pull-Cord Station. When installed, the gaskets provide a water-resistant seal, allowing the SF123 station to be used in wet environments such as showers, baths, and tub rooms while also facilitating easier cleaning. The kit contains five (5) gaskets.

Features

- Water-resistant gasket kit for the SF123 station
- Allows installation in wet environments
- Suitable for showers, baths, and tub rooms
- Helps provide easier cleaning of the installed station
- Pack of 5 gaskets

Applications

The RP187K is intended for installations where the SF123 Customizable 2-Button Pull-Cord Station is exposed to moisture or frequent washdowns, including:

- Shower rooms
- Bathrooms
- Tub rooms
- Other wet healthcare environments requiring a water-resistant station installation

UL Listing Information

The RP187K Gasket Kit does not have an independent UL listing. It is an accessory used with the SF123 Customizable 2-Button Pull-Cord Station, which is part of TekTone nurse call systems listed as:

- UL[®] 1069 Listed – Hospital Signaling and Nurse Call Equipment
- cUL[®] Listed to CSA C22.2 No. 205
- UL File Number: E71599
- RoHS Compliant

Gasket Kit for SF123 Station Installation in Wet Environments (Pack of 5)

Technical Specifications
