**DESCRIPTION**

The R4K28A-S is a dual bed station that allows both patients and staff to place different call-in priorities, depending on their requirements, to the assigned console(s). The station also allows of placing emergency calls, code blue calls and staff registration to the assigned console(s). These calls can be customized or removed for more flexibility. The bed station can interface with call cord and allow intercom to the console over the station speaker.

The bed station is connected to its associated corridor light or domeless room controller and is continually supervised for station presence. Through programming, a "Trouble" message call can annunciate at the associated console(s) when the station is removed from the system.

**ASSOCIATED EQUIPMENT**

- CLA222, CLA244 – Audio Corridor Lights
- DCA200, DCA216 – Audio Domeless Room Controllers
- CCDIN – Call Cord
